ACKNOWLEDGEMENTS

The thesis entitled "Some Analytic Solutions of Einstein And Einstein-Maxwell Equations", containing twelve chapters and two appendices, concerns with the researches which I have been carrying on since 28th July 1992 at the Department of Mathematics, School of Sciences, Gujarat University, Ahmedabad, under the guidance of Dr. L. K. Patel.

The contents of some of these chapters have been published in journals like, International Journal of Modern Physics, Hadronic Journal, Pramana - Journal of Physics and Mathematics Today.

I would like to record with great pleasure my deep sense of gratitude and thanks to Dr. L. K. Patel, Reader in Mathematics, School of Sciences, Gujarat University, for suggesting problems for my research work. His innovative guidance invaluable suggestions, constructive criticism, sound advice, constant encouragement and providing strong motivational force throughout the course of present study, apart from the devotion of his valuable time, have contributed to the successful completion of the thesis.

I wish to express my sincere thanks to Dr. A. K. Desai, for rendering constant help and teaching me the particular computer language due to which I could successfully type my thesis.

Thanks are also due, to all my teachers and non-teaching staff who have rendered timely help to me during the present study.

I gratefully acknowledge the scholarship awarded by Gujarat Govt. during the tenure of which the present investigations were carried out.

I am indebted to my parents, brothers-in-law and sisters, for their encouragement and moral support, all throughout the course of present study.

AHMEDABAD

APRIL, 1997.

(LAKSHMI S. DESAI)
