LIST OF PAPERS PUBLISHED / ACCEPTED FOR PUBLICATION

P. NO. 169 - 170
LIST OF THE PAPERS PUBLISHED / ACCEPTED FOR PUBLICATION

- An EOQ model deteriorating items under random supply

- A lot size model with finite production rate for deteriorating items under random supply.

- A lot size model for exponentially deteriorating inventory when delay in payments is permissible.

- A lot size model for exponentially decaying inventory under known price increase.

- Probabilistic time scheduling model for exponentially decaying inventory under temporary price discount.

- Probabilistic time scheduling model for exponentially decaying inventory under known price increase.
  Accepted by IJOMAS, New Delhi.

- A probabilistic order level system when delay in payments is permissible.

* Probabilistic time scheduling model for exponentially decaying inventory when delay in payments is permissible.

Published in INTERNATIONAL JOURNAL OF PRODUCTION ECONOMICS, Vol. 32, PP. 77 - 82, 1993.

* An EOQ model for exponentially decaying inventory under temporary price discount.

Accepted by Cahiers du CERO, Belgium.

* Probabilistic order level system when items in inventory deteriorate and delay in payments is permissible.

Accepted by Asia - Pacific Jr. of OR, Singapore.
