Acknowledgments

The importance and usefulness of the problem that forms the basis of the present thesis was brought to the author's mind by his teacher and distinguished guide, Prof. S. B. Saksena, F.N.A., Head of the Department of Botany, University of Saugar, Sagar (M.P.). The work was undertaken on his initiation and the author received from him continued guidance and encouragement throughout the course of the study, which is gratefully acknowledged. The author tries in vain to find suitable words to express his sincere gratitude to him, who took lot of pains in critically persuading the final manuscript.

The author is also grateful to Prof. S. S. Nigam, F.N.A.Sc., Head of the Department of Chemistry, University of Saugar, Sagar, for his kind permission to use Beckman DU-2 spectrophotometer and for providing other laboratory facilities.

It is indeed a pleasure to acknowledge the generous help extended by research scholars of the Department, particularly Dr. S. C. Chourasia, Shri A. K. Muthal, Shri J.P.N. Pandey and Shri C. P. Bajpai, to whom the author is highly obliged.

Much of the experimental work of chemical analysis was conducted in the Department of Chemistry, where the help rendered by Dr. A. S. Mishra and Shri K. K. Pathak is acknowledged with sincere thanks.

The author is also grateful to Prof. P. L. Golwalker, Principal, Govt. P.G. College, Tikamgarh (M.P.), for having granted him leave from time to time. The author expresses his earnest thanks to his colleagues Shri R. M. Goswami, Asstt. Prof. and Shri S. M. Khanna, Lecturer, Govt. P.G. College, Tikamgarh, for their kind co-operation and good will.

(iv)
Thanks are also due to the U.G.C. for awarding the Junior Fellowship, during the tenure of which these investigations were carried out.

Lastly, the author wishes to thank his wife Aruna Dube for her constant help in various spheres.

S. P. DUBE
