Acknowledgments

My very special thanks, firstly, are to my Research Supervisor, Professor Dr R D Mathad, Department of Physics, Gulbarga University, Gulbarga. I could not have imagined having a better advisor and mentor than him for my Ph.D. studies. I would like to thank him for his invaluable lessons, suggestions and for the freedom he granted me during my research work. He encouraged me with new ideas and good advice throughout the course of my Ph.D. studies. I would have been lost without his guidance and concern. This thesis would not have been possible without his invaluable help and timely support, for which I remain indebted to him throughout my scientific career.

I thank also the Chairman and all teaching and non-teaching staff at the Department of Physics, Gulbarga University, Gulbarga for their help and cooperation during my Ph.D. work.

I would also like to thank Dr. G.P. Kothiyal, Sri P.S.R. Krishna who gave me the confidence and support for the research work and their expertise in Glass and Glass Ceramics and neutron diffraction analysis. I am especially obliged to Dr. Ajit Kulkarni, IIT Mumbai, Dr. B.B. Kale CEMET, Pune, and Prof. S. Asokan, IISc, Bangalore for their help in electrical conductivity, SEM and memory switching measurements of glass samples. I would also like to acknowledge UGC-DAE facilities and neutron diffraction measurements at Dhruva Reactor, SSPD BARC, Mumbai. I also extend thanks to A.B. Shinde, SSPD and Rakhesh Kumar, Glass and Advanced Ceramic, Division, BARC for their technical supports.
I am lucky enough to have, during my years of research, the support of Dr. Pratima Mathad, Professor of Botany & Chairman, Department of Environmental Science, Gulbarga University, Gulbarga. I am thankful for all her personal care and encouragements.

I express thanks to my friends: Sazia, Sadia, T. Rajeshwari, Balaji, Mahalesh and those others who wanted to remain anonymous. I am grateful to them for helping me get through the difficult times.

Lastly, and most importantly, I wish to thank to my teacher and father Dr. M.S. Jogad, PI-UGCDAE, R/P, Sharansaveshwar College of Science, Gulbarga, and to my mother Smt. Savitri M. Jogad. They bore me, raised me, supported me, taught me, and loved me. I am forever indebted to them for their understanding, endless patience and encouragements. My big thanks are also due to my elder sister, Smt. Bhuvaneswari Jogad and Brother-in-law Er. Basavaraj Hirapur, my three nephews Aneesh, Avaneesh, and Daksh for their love and absolute affection. My sincere thanks to my family members: Father in law- Shri. Parmeshwar, Mother in law- Smt. Surekha, Brother in law-Shri. Mahesh, Sister-Jyothi and Sister-in law-Sridevi. Not forgetting, I would like to give my special thanks to my husband Er Prakash Salagare and my newly baby born (Dhirti), who shared my happiness and made me happy, and also for some very special moments when the going was tough.

The thesis is the product of many years of work and a substantial amount of anonymous assistance for which I extend my sincere gratitude and appreciation.

Rashmi Jogad Mahantappa Jogad
