ACKNOWLEDGEMENTS

I take this opportunity to thank my supervisor Dr Pushkar Sharma for his sincere help, support, criticism and patience all through the course of this study. His constant guidance and quest for excellence has helped me become a better student, researcher and person. Needless to say, this work would not have been possible without his vision and expecting nothing but the best from me.

I wish to thank Dr. Avadhesha Surolia for his support and providing a conducive research environment in NII. The financial support provided by NII is duly acknowledged. Special thanks to Mrs Sanju and Late Mr Akhilesh Aggarwal for their help in all administrative matters.

I would like to thank my Doctoral Committee Members Dr Chandrima Shaha, Dr Swati Saha and especially Dr Vinay K Nandicoori for taking keen interest in my work. Dr Yogendra Singh, Prof Daman Saluja and Dr Ayub Qadri for always encouraging me.

I want to thank my seniors for making the laboratory a wonderful place to be in. Having Ankush, Ravikant, Mayur, Anwar, Aparna and Narayan around made everything easier. Also, Naresh, Divya, Suran, Guru, Hari, Praveen, Prakash, Kavita, Deepti and Prashant made working in the lab enjoyable. I thank Naresh and Narayan for their support and help in the initial stages of this work. Manoj ji’s help is duly acknowledged.

My batchmates, specially Smriti, Beena and Shazia have been my constant companions in NII. Thank you Hamid and Vineet, for always being there. Many thanks go to Anshita, Jasmine, Shipra and Hemant for their good wishes.

I want to thank my parents for all their love, for all their encouragement, for filling me with new energy and enthusiasm to tackle each and every day as if it were the most important day of my life. For helping me go through all my trials and tribulations with amazing strength of character, faith and honesty. My grandparents for all their blessings. My sister, brother, Nidhi, Vivek, my dearest Ajay Mama, Mami, and Mausi for praying for me. 😊

Thank you God, for everything.

EGE Laboratory
