Acknowledgements

Looking back, I am surprised and at the same time very grateful for all I have received throughout these years. It has certainly shaped me as a person and has led me where I am now. All these years of PhD studies are full of such gifts.

I wish to express my deep gratitude to my supervisor Prof. Sudha Bhattacharya whose support, stimulating suggestions and encouragement helped me in all the time of my research and writing this thesis. She has always been a constant source of inspiration and working under her guidance has been an enriching experience for me. Joining her was the beginning of my quest for Science. At that time, I never dreamed that one day I would have the honor of working with such an esteemed scientist. I thank you Ma'am for all the encouragement and support you provide me and the confidence you had in me. I am equally thankful to Prof. Alok Bhattacharya for his positive criticism and invaluable suggestions. The confidence and dynamism with which he guided me require no elaboration. I am really grateful to Sudha Ma'am and Alok Sir for guiding me for those excellent six years and supporting me in every situation. It was most memorable moment when both of you visited my hostel when my leg was injured.

I never believed I would be in a position to thank Prof. D. N. Rao, IISc, Bangalore for providing me support when I was in a budding stage of scientific growth. Time spent in his lab was really very pleasant and cheerful with lots of scientific inputs. Every researcher who knows DN wishes to work with him and fortunately I was one of them.

I would like to thank Dr. Suman Dhar and Dr. Devender Sehgal for valuable discussions. I thank Dr Dhar’s lab members for helping me in troubleshooting in protein work and raising polyclonal antibodies.

I would like to thank Dr. Varsha Sharma for her all time support and care. The time spent in the hostel during her and my own “Tenure” was really great. I will always miss those days when we used to cook and have food in Mam’s home.

I would like to express my sincere thanks to Dr M.P. Yadav and Dr. Satyamanyu Yadav, DGC Gurgaon. Both of you were inspiration for me to study science.

Fellowship from CSIR is duly acknowledged.

I thank all the present and past Deans of School of Environmental Sciences for their cooperation and facilities.

Administrative staff of SES has been very helpful during various needs. Rawat Sir was always helpful and having solutions of all the technical problems regarding University Clauses. Although he used to admonish me for delayed submission of reports but this was his affection and kindness for me. Thank you Rawat Sir.

I thank the CIF staffs of SES for making things available and their concern. Special thanks to all concern faculty members and volunteer students who helped in maintenance and proper functioning of CIF. I would like to thank all Deans of SLS for providing CIF facility of their School whenever I was in need.

I thank the staff and administration of Animal House, JNU for providing all facilities of handling and maintenance of animals for raising antibodies.

I sincerely thank Jeevan ji. Manoj ji, Sajjan ji and Sumer ji for their help and making things available as and when required. Whenever I enter in the lab, I usually see Jeevan ji with smiling face and asking about my well being. He never says no to anybody regarding lab cleaning or shifting lab’s stuff. Manoj ji is our officer, he usually says ‘no’ and it depends on you to make it ‘yes’. We used to have lunch together with Manoj ji and Jeevan ji and it was
really a healthy experience. Our chacha (Nagender ji), he always ask me about the progress! He used to provide radioactive badges quarterly and making things easy. Special thanks to Om Prakash ji for technical assistant in getting fellowships timely.

I thank all my lab seniors Prabhat da, Abhijeet da, Shweta di, Sunil, Gagan, Divya di, Alka di, Rekha di, Ruchi di and Narendra for providing excellence guidance and support. I have learned a lot from Prabhat da, from holding pipette to keys of molecular biology. Abhijeet da was really extra talented. He taught me basics in science. I really appreciate Gagan sir for his vast knowledge and teaching me basics in protein biology.

Lab meeting are good source of new ideas. I feel lab meetings played a great role in developing our data presentation skill.

Lab trips and other celebrations were really memorable. I would like to thanks Narendra for being my companion during mountain sickness. I am not able to count each and every lab trip but what I have in mind, bearing memories of those days. Thank you Ma'am and Sir for taking so much pain in organizing all those trips.

Furthermore I am deeply indebted to all my labmates in SES. Abhishek, Vandana, Sandeep, Jitender, Nishant, Ankita, Sujata, Jamal, Amit and Rahul. I have seen very cordial atmosphere in my lab and credit goes to all these guys. Many times I used to scold them for small mistakes but they never revert back. One peculiar thing about our lab is that it is very difficult to hold some eating stuff for longer time when Abhishek, Sandeep and Jitu are present in the lab. Vandana is really doing great efforts to maintain discipline in the lab. Keep it up Vandana.

I have received ample of respect from all of them. Thank you dear for being with me during last couple of years. I wish you all a bright future and a cheerful life ahead.

I would like to thanks all my labmates in SLS for providing me support and care. Shiteshu, Somlata, Saima, Shahid, Hafij, Arpita, Mridula and Jitendra were always supportive and helpful. No special mention for anyone but everyone paid me full respect and care.

In particular, I wish to express my thanks to Shiteshu. He always helped me in maintaining amoeba culture and making cell lines. He used to scold me for silly mistakes but that was his way to express his love and care for all the labmates! No one can compete him in his sharp senses and the data analyzing capability. Parties with Abhishek and Shiteshu were full of gossiping with great fun. I really miss them yaar.

It's great to have friends that are always there for you. I am grateful to have a company of a very sweet and caring friend Ankita. In simple and brief I have evolved a good listener and become modest in last couple of years. She always supports me beyond the expectations and I prefer no formality in saying thanks for that.

During last couple of years many summer trainees, project worker joined our lab. Initially it was very difficult to answer basic scientific queries of these new comers but it helped me in gaining fundamental knowledge of science. I wish them a very bright future.

It was very difficult to cope with subject of typical Environmental Science during course work. I am grateful to have such a nice M. Phil batch mates, Shibaji, Deepak, Prashant, Kushagra, Shashi, Rajesh, Rakesh, Sharmila, Akanksha, Vishmohan, Pradeep and Sanyogita who not only supported me but provided notes and books whenever required.

I would like to thanks all members of DN's lab. Prashant, Aarti, Visha, Madhusudan, Madhu, Arun, Swayam Prabha, Ruchika, Sameera and Chiru for their support and care they paid me during stay in IISc. I would like to thank Madhusudan and Madhu for assisting me in CD spectroscopy and BIAcore.

Six years spent in JNU were really great and with full of fun. It was very nice to have a cup of tea in Unush's canteen with Bidisha. Thanks Bids for your support and care. Vijay Kalra... apne kalra saab... I will always remember those Gulab Jamun in Rao's canteen and in Aravali Guest House with Jatin and Kalra saab. That trip of Vaisnodevi when Jitu was carrying maximum stuff and still leading us. Those days of Pulse in AIIMS were really memorable.
I used to go in all dance parties in JNU with Jatin and Jitu. I received enough respect, love and care from Ajay, Jyoti, Bijender, Naresh and Jay. Even some time I was in anger, they always taken care of me. Some feelings can’t be expressed in words and thus I can’t. I feel I evolved in those days and it was their support and love that will never end. Special thanks to Laxmi ji, Jyoti ji and Dinesh for their support during my President tenure. They took all my responsibilities of the hostel and helped me in each respect. Jyoti ji, I can’t forget your care for making food available at my room during my illness. Tea break with you at night during thesis writing was always energetic and relaxing which was really essential during that phase.

I am also thankful to all my friends in JNU. Prem Bhai and Kishor Bhai supported me when I joined JNU. Prem Bhai always inquires me about the status of my research and gives lots of inspirations. Amardeep, Rakesh and other friends of Haryana have been always with me in all happy or sad moment of life in JNU.

I am also thankful to all my friends and juniors in Sabarmati Hostel for their support and care.

I have a privilege of having a large friend circle. I have been endowed with lots of love and inspiration from my dearest Sandeep and Seema. The confidence and courage today I bear, is just because of Sandeep. Working for Krantikari Yuva Parishad has been a great experience which provided me enthusiasm to work for the betterment of mankind. Dr. Amir Singh is my mentor and Shastri ji is my respectable. They both taught me the way to live life and way for betterment of society.

I am very grateful to being close to a very nice and courteous girl who not only supported me but provide me great strength in last couple of months. Her love and care have been always with me. I am in dilemma whether her name to be disclosed or not but I have a feeling that God is with me and he will not only help me in getting rid of this dilemma but give me a perfect second half of life.

Most importantly, I am deeply indebted to all my family members for their love, support, inspiration and understanding during my PhD tenure. I wouldn’t have been here without their sacrifices and blessings. Being youngest in my family I have a privilege of getting everything I desire, and I received indeed. I have been endowed with lots and lots of love and affection from Pitaji, Mummy, Bhai, Bhabi, Didi and Jijaji. I have always a feeling that I have not given enough time to my elders and my dearest niece and nephews. The love and support I am getting from all my elders and niece and nephews is beyond the format of this acknowledgement.

Above all I thank Almighty God who has been very kind and is always with me.

Vijay
