Acknowledgements

My supervisor, Dr. Jayant Tripathi, has helped and supported me a lot during my Ph.D. research work. I cannot imagine a step in this work without his support. His guidance as a senior researcher and support as a friend were instrumental in making this work see the light of the day. I am falling short of words to describe his role in inculcating an insatiable interest in me for the subject and in inspiring me to complete my Ph.D. thesis in due time.

Prof. V. Rajamani, a pillar of knowledge, showed me the path of this research work. The ideas and perspectives that make science useful to mankind can only come through his level of expertise. His sharp observations and incisive comments helped me hone my research skills. I will always remain indebted to Rajamani Sir for his help in finding my moorings in environmental science.

I would like to thank the Dean, SES, Prof. Sudha Bhattacharya, and former deans, Prof. K.G. Saxena, Prof. V.K. Jain for helping me with their intellectual inputs and for providing all the materials at their disposal. I also express my thanks to Prof. A.K. Attri, Dr. A.P. Dimri, Dr. N.J. Raju and Dr. Sudesh Yadav and other faculty members of SES, who have provided their help in all possible ways.

I acknowledge the CIF staff members, Gaekwad ji, Sharma ji, Rawat ji and Bharadwaj ji for providing me with the facilities and knowledge support as and when I needed them. The staff members of SES, especially Rawat sir and Bahtia ma’am were more than eager to lend me a helping hand in completing tedious official work and formalities.

The funding agencies, ICMR and UGC, are to be duly acknowledged for their financial support. Their financial aid freed me from so many worries and helped me concentrate on my research work.

Special thanks are due to Nakul Pandey ji, Baburam ji and Pawan, who have assisted me in all the ventures in the lab.

My seniors, Dr. Deepika Pandey, Dr. Pankaj Mehta and Dr. Ankit Tandon introduced me to the lab and its working ethics. The contribution and encouragement of my wonderful lab mates, Cheenu, Deepika, Divya, Sandeep, Sumi, Yama and Shweta is indispensable for this acknowledgement. Together, they constituted a huge support
system for all my ventures in and out of the lab. My class mates, Deepak, Rajesh, Shibaji, Reena, Kushagra and Sharmila were always there for discussing and consulting anything under the sun.

Apart from Ph.D., JNU has helped me find the treasures of life which lies in true friends like Kishore Wankhede, Swarnalatha and Gulbin. I will always cherish their friendship.

I owe more than a lifetime gratitude to my mummy-papa, bhaiya-bhabhi, chachi ji for their constant encouragement and support at every stage of my life.

I express my heartiest appreciation to my in-laws, Arun fufaji and all family members for accepting me the way I am.

Finally, I thank Indrajeet, my husband, whose time-to-time critical comments and constant nagging compel me to get things done promptly, both in lab and at home.

Lastly, I bear the responsibility for any error in the present research work.
