Acknowledgements

I find it difficult to give words to the sense of gratitude that I owe to the people who have lent their helping hands, directly or indirectly during the course of this study. I must apologize if I have not been able to do justice to the people who have been skipped out of my mind inadvertently.

It has been an extremely enriching experience to conclude the work. Looking back it was a long way with lots of difficulties, excitement and exhilaration. It was possible just because of Dr. Sonajharia Minz, my supervisor. I take this opportunity to express my deepest gratitude to Dr. Minz for her guidance, patience and advice throughout the program. Without her motivation and moral support, constructive comments and criticism, this work would not have been possible at all. This thesis is entirely due to her interest.

I am indebted to Dr. Mruthyunjaya, the Director, NCAP, New Delhi for his valuable support, guidance and permission to use the agricultural dataset. He has also been very considerate in providing me study leave and relieving me from the duties which facilitates the beginning as well as completion of this endeavour.

I am extremely thankful to Prof. Karmeshu, the Dean, SCSS, JNU for providing all the facilities and necessary guidance for completion of the work. I wish to extend my sincere gratitude to Prof. K.K. Bhardawaj for his continuous encouragement and advice, which has also served as a source of inspiration during the course of this study. I am also grateful to Prof. Parimala for her ungrudging help and valuable support during the course of this study.
I greatly appreciate all the help extended by the staff SCSS, JNU who have been always very helpful and obliging. I take this opportunity to thank the staff of NCAP, New Delhi for all the necessary assistance.

I am thankful to all my colleagues from NCAP and IASRI who helped me during the study. I acknowledge the help of Dr. Adhiguru and Dr. Rama for their timely help and discussions.

Besides my supervisor, many of my friends and colleagues have also assisted with and offered valuable comments while reviewing my research. However I would like to thank especially Rajiv, Sanjay, Sunita, Simmi, Sudha and Dr. A.K. Jain for attempting proofreading of this thesis and suggesting improvements. All mistakes that remain are, of course, my errors.

I wish to thank my husband, Bhushan Jain, for his unconditional and unreserved support. Without his co-operation it would have been very difficult to complete the thesis. Thanks.

My real gratitude is greatly indebted to my parents, my brother Rajiv, my sisters Rita and Sunita without whose blessings and support it would not have been possible to complete the work in time. I must recognize the support, patience and understanding of my family members especially my parents-in-laws and my children for their invaluable love, inestimable patience and innumerable sacrifices.

RAJNI JAIN
