List of Tables and Figures

Table 1. Details of samples used in the present study (p. 19)
Table 2. International reference standards for isotopic composition (p. 27)
Table 3. Isotopic measurement results of Solenhofen limestone (p. 28)
Table 4. Calculated linear sedimentation rates (p. 38)

Figure 1. Sediment core locations and surface water circulation system in the study region (p. 7)
Figure 2. Age-model derived for SK117-GC08 sediment core (p. 33)
Figure 3. Age-model derived for SK129-CR04 sediment core (p. 35)
Figure 4. Age-model derived for SK117-GC02 sediment core (p. 37)
Figure 5. Sand, silt and clay fractions in SK117-GC08 sediment core (p. 39)
Figure 6. Sand, silt and clay fractions in SK129-CR04 sediment core (p. 41)
Figure 7. Sand, silt and clay fractions in SK117-GC02 sediment core (p. 41)
Figure 8. Calcium carbonate variation in SK117-GC08 sediment core (p. 42)
Figure 9. Calcium carbonate variation in SK129-CR04 sediment core (p. 43)
Figure 10. Calcium carbonate variation in SK117-GC02 sediment core (p. 44)
Figure 11. Sedimentary excess-Al and excess-Mn variation in SK117-GC02 core (p. 45)
Figure 12. Sedimentary organic carbon and nitrogen in SK117-GC08 core (p. 46)
Figure 13. Total-alkenones variation SK117-GC08 core (p. 47)
Figure 14. δ13Corg variation in SK117-GC08 core (p. 48)
Figure 15. Sedimentary δ15N in SK117-GC08 core (p. 48)
Figure 16. Time-series record of calcite δ13C in all the three studied sediment cores (p. 50)
Figure 17. Time-series δ18O for global ice-volume correction (Shackleton, 2000) (p. 52)
Figure 18. Variation in δ18O_g.sacculifer through LGM-Holocene period (p. 56)
Figure 19. Ice-volume corrected δ18O_g.sacculifer in SK117-GC08 and SK129-CR04 (p. 58)
Figure 20. Residual δ18O_g.sacculifer contrast between SK117-GC08 and SK129-CR04 (p. 59)
Figure 21. Residual δ18O_g.sacculifer record compared with the grain size in SK117-GC02 (p. 68)
Figure 22. Schematic drawing showing transport of relict sediment at lowered sea level (p. 71)
Figure 23. Silt:clay ratios during the last glacial period in all the three sediment cores (p. 73)
Figure 24. Holocene-LGM carbonate flux variation in all the three sediment cores (p. 77)
Figure 25. Carbonate fluxes in two deep-water sediment cores (p. 79)
Figure 26. X-Y scatter plots for various organic components in SK117-GC08 core (p. 80)
Figure 27. Time-series variation of organic and inorganic proxies in SK117-GC08 (p. 84)
Figure 28. Total alkenone contents in Holocene-LGM sections of SK117-GC08 core (p. 85)
Figure 29. Comparison of sedimentary δ15N records across the Arabian Sea (p. 88)
Cartoon: Diagrammatic representation of changes in salinity structure of low-salinity tongue (p. 67-68)
