ACKNOWLEDGEMENTS

Inspiration and hard work always play a key role in the success of any venture. There is always a sense of gratitude and indebtedness that one expresses to every person who has contributed to his work. Gratitude cannot be seen or expressed. It can only be felt in heart and beyond description.

First of all, I thank the Almighty, the supreme power behind us, who has always guided me to follow the right path. I am deeply indebted to my parents who always keep encouraging me to achieve new heights. Their blessings have been pivotal to the completion of the present work for which I fail to find words to repay the favor in terms of love and affection.

I gratefully acknowledge my deep sense of gratitude to my supervisor and guiding light in my life, Dr. P.K. Suri, Former Dean, Faculty of Engineering & Technology, Faculty of Science and Former Professor & Chairman, Department of Computer Science & Applications, Kurukshetra University, Kurukshetra, (Haryana). It was he who encouraged me in the first place to start off the present work and then guided this work all along and helped me realize the dream of my parents and my family. He kindly shared his experience, and helped me build up expertise. His great insight, intelligence and experience have influenced my life. Diction seems inadequate to express my appreciation for his sagacious guidance at each step, unfailing interest, critical appreciation, constructive counsel, creative ideas, sustained encouragement and moral inspiration since the very first day I came in contact with him.

I would like to thank Dr. Shuchita Upadhyaya, Chairperson, Department of Computer Science and Applications for her administrative support and guidance.
I am grateful to Dr. (Mrs.) Pushpa Suri, Professor, Department of Computer Science and Applications, Kurukshetra University, Kurukshetra for her affectionate attitude, encouragement and valuable suggestions.

I convey my sincere thanks to Dr. Gurdev Singh, Lead Software Engineer, Samsung Electronics, Noida for help and encouragement in all possible ways during my research work.

Sometimes words are too reticent to mark one’s inward feelings and here I’m experiencing the same. I am actually falling short of words to express my deepest sense of appreciation to my better half for extending her unconditional love and support, patiently listening to my endless talks related to my research work and uplifting my morale during testing times. My sincere appreciations are due to my seven year old loving son and my little daughter who has seen this beautiful world only three months back, for sparing me to complete this work at the cost of their time.

Finally, I would like to thank all those whose direct and indirect support helped me in completing my thesis in time.

Sandeep Kumar
