ACKNOWLEDGEMENTS

This thesis arose as part of years of research carried out since I joined Kerala Forest Research Institute as a Junior Research Fellow under Dr. RV Varma, Programme Coordinator, Forest Health Division. Foremost, I would like to record my gratitude to Dr. RV Varma for persuading me to register for PhD and for his supervision. This thesis would not have been possible deprived of the help, support and patience of my supervising guide, who gave me ample freedom to work, spend lot of time to correct the thesis during his hectic schedule. I am indebted to him more than he knows.

Many thanks to Dr. KV Sankaran, Director, KFRI and Dr. JK Sharma, Former Director for their advice, interest in my research and for providing facilities.

I gratefully acknowledge Dr. UM Chandrashekar, Scientist in Charge, KFRI Subcentre, Nilambur, who was the PI of the research project, in which I was engaged and with whom I spend most of my research time. His crucial contributions and involvement has triggered and nourished thoughts and activities. I extend my sincere thanks to him.

I would like to express my gratitude to members of Doctoral and Research Committees, especially, to Dr. VV Sudheendrakumar (HoD, Forest Entomology Department, KFRI) and Dr. Jose Kallarackal (Emeritus Scientist, KFRI) for their valuable contribution, advice and suggestions. I am grateful to Dr. EA Jayson, Chairman of PhD programme, for his timely help and constructive suggestions in the due course of work. Special thanks to Dr. Ammini Joseph and Dr. Suguna Yesodharan of SES, CUSAT for their help and support.

I would like to thank Dr. KG Saxena (Professor, SES, JNU) and KS Rao (Professor, Delhi University) for their moral support. I owe my deepest gratitude to Dr. Sr. KA Karmaly (St. Xavier’s, Aluva), Dr. JM Julka (Emeritus Scientist, ZSI, Solan), Dr. R Paliwal (ZSI, Kolkata) and Dr. Radha D Kale (UAS, Bangalore) for identifying specimens and teaching me basic taxonomy and ecology.

I was delighted to interact with Dr. GW Silesli (ICRAF, Malawi) and Dr. Jens Dauber (Institute of Biodiversity, VTI, Germany) and acknowledge their encouragement, help and interest in my work.

I convey my special acknowledgement to Dr. George Mathew, Dr. TV Sajeed and Dr. M Sivaram of KFRI for their help and support during the study.

I am obliged to staffs of KFRI library and LAN for their cooperation.

I am indebted to my co-workers especially, Baiju, Santhosh and Shanavas for support in the field and lab. It is pleasure to thank them. I would like to thank residents of Karakkode area, for allowing me to conduct experiments and to collect samples from their plot, exchanging information and seamless help during field work.

I am grateful to all my lab buddies and friends at KFRI, especially, Mary, Swaran, Siyad, Raju, Manju, Suganthan, Babu......(I know, the list is incomplete).

I am indebted to my parents for their vision to educate me. It is an honour to thanks my brothers and in laws and more than that their kids Anu, Sonu and Raniya for innocent love and affection.

This work was completed utilizing fund of UNEP/GEF/TSBF-CIAT/JNU/KFRI coordinated programme on conservation and sustainable management of belowground biodiversity. I thank the authorities for financial support and excellent training.

Last but not least, I thank God for His blessings. You have made my life more bountiful. May your name be exalted, honored, and glorified.
