CHAPTER                  PAGE

O  INTRODUCTORY CONCEPTS                             1
    0.1  PRELIMINARY                                     
    0.2  SOME DISTINGUISHED SETS                          
    0.3  MAPPINGS                                        

I  NEW MAPPINGS IN TOPOLOGICAL SPACES                 13
   1.1  SOME NEW MAPPINGS                                 
   1.2  ALMOST FEEBLY CONTINUOUS FUNCTIONS               
   1.3  ALMOST SEMI CONTINUOUS FUNCTIONS                 

II  EXTENSIONS OF THE CLASSES OF OPEN AND              94
    CLOSED MAPPINGS                                    
    2.1  FEEBLY OPEN MAPPINGS                            
    2.2  GENERALIZATION OF CLOSED MAPPINGS               

III  QUASI OPEN SETS AND THEIR APPLICATIONS            94
     3.1  QUASI OPEN SETS                                
     3.2  QUASI R₀-SPACES                              
     3.3  QUASI CONNECTED SPACES                        

IV  QUASI FEEBLY OPEN SETS AND THEIR ROLE             125
    4.1  QUASI FEEBLY OPEN SETS                          
    4.2  SOME NEW AXIOMS OF SEPARATION                  
    4.3  SOME NEW MAPPINGS                              

V  SEPARATION OF SETS BY SOME DISTINGUISHED SETS      167
    5.1  QUASI REGULAR AND QUASI NORMAL SPACES           
    5.2  PAIRWISE FEEBLY NORMAL SPACES                  
    5.3  QUASI FEEBLY REGULAR AND QUASI FEEBLY           
          NORMAL SPACES                                 

BIBLIOGRAPHY                                         196
