**List of Tables**

1. Table 2.1: Showing information regarding age-wise distribution of the samples
2. Table 2.2: Shows information regarding sex-wise distribution of the samples
3. Table 3.1: Showing information regarding age-wise composition
4. Table 3.2: Showing information regarding educational attainment
5. Table 3.3: Showing information regarding marriage practice
6. Table 3.4: Showing information regarding clan-endogamy
7. Table 3.5: Showing information regarding village exogamy & endogamy
8. Table3.6: Showing information regarding type of family
9. Table 3.7: Showing information regarding age at the time of marriage
10. Table 3.8: Showing information regarding some demographic indicators
11. Table 3.9: Showing information regarding fertility rates and ratios
12. Table 4.10: Showing information regarding major health problems of the village
13. Table 4.11: Showing information regarding five most common diseases of the village
14. Table 3.12: Showing information regarding few mortality rates
15. Table 3.13: Information regarding age at the time of death during last one year
16. Table 3.14: Showing information regarding the causes of deaths
17. Table 4.1: Trends of health status
18. Table 4.2 Sex-wise health status trends of Baigas
19. Table 4.3: Age-wise trends of health status
20. Table 4.4: Socio-religious practices and health status
21. Table 4.5: Taboo during sickness and health status
22. Table 4.6: Occupation and health status
23. Table 4.7: Land occupied by the household and health status
24. Table 4.8: Irrigated land possess and health status
25. Table 4.9: Monthly income and health status
26. Table 4.10: Debt situation and health status
27. Table 4.11: Reason of debt
28. Table 4.12: Debt rate
29. Table 4.13: Sanitation around the house and health status
30. Table 4.14: Disposal of garbage and health status
31. Table 4.15: Cleaning habits of house and health status
32. Table 4.16: Cleaning habits of animal dung and health status
33. Table 4.17: Cleaning habits of teeth’s and health status
34. Table 4.18: Cleaning material of teeth and health status
35. Table 4.19: Season wise habits of taking bath and health status
36. Table 4.20: Using material of bathing and health status
37. Table 4.21: Type of bathroom and health status
38. Table 4.22: Place of defecation and health status
39. Table 4.23: Cleaning habits of defecation and health status
40. Table 4.24: Cleaning material of cloths and health status
41. Table 4.25: Hair care health status
42. Table 4.26: Forestation and health status
43. Table 4.27: Type of house possessed and health status
44. Table 4.28: Accommodation and health status
45. Table 4.29: Ventilation and health status
46. Table 4.30: Source of drinking water and health status
47. Table 4.31: Storage of water and health status
48. Table 4.32: Source of lighting and health status
49. Table 4.33: Fuel used and health status
50. Table 4.34: Exit of smoke and health status
51. Table 4.35: Test choice and health status
52. Table 4.36: Intake of non-vegetarian foods by the Baigas
53. Table 4.37: Frequency intake of non-vegetarian food items and health status
54. Table 4.34: Usual intake of different food items on health status
55. Table 4.39: Name of food items which are prohibited by their religion/taboo
56. Table 4.40: Distance between household to health facilities utilization and health status
57. Table 4.41: Visiting hospital during last one year and health status
58. Table 4.42: Purpose of visits to various government medical centres
59. Table 4.43: Cause of not visiting the Govt. hospital
60. Table 4.44: Visiting of health worker during last one year and health status
61. Table 4.45: Purpose of visit of health worker
62. Table 4.46: Immunization of children and health status
63. Table 4.47: Knowledge of benefit of immunization
64. Table 4.48: Concept of utility of immunization
65. Table 4.49: Awareness related to name of diseases prevented by immunization
66. Table 4.50: Sickness during last one year
67. Table 4.51: Type of treatment received and health status
68. Table 4.52: Communication medium and health status
69. Table 4.53: Transportation medium and health status
70. Table 4.54: Knowledge of genetic indicators or genetic diseases
71. Table 5.1: Showing information regarding concepts of health among the Baigas
72. Table 5.2: Showing information regarding the concept of diseases
73. Table 5.3: Showing information regarding the possible causes of the fever
74. Table 5.4: Showing information regarding the possible causes of the cough and cold
75. Table 5.5: Showing information regarding the possible causes of the vomiting
76. Table 5.6: Showing information regarding the possible causes of the earache
77. Table 5.7: Showing information regarding the possible causes of the diarrhea
78. Table 5.8: Showing information regarding the possible causes of the stomach-ache
79. Table 5.9: Showing information regarding the possible causes of the head-ache
80. Table 5.10: Showing information regarding the possible causes of the body-ache
81. Table 5.11: Showing information regarding the possible causes of the skin burn
82. Table 5.12: Showing information regarding the possible causes of the eye infection
83. Table 5.13: Showing information regarding the possible causes of the jaundice
84. Table 5.14: Showing information regarding the possible causes of the tooth-ache
85. Table 5.15: Showing information regarding the possible causes of the oral ulcer
86. Table 5.16: Showing information regarding the possible causes of the swelling of stomach
87. Table 5.17: Showing information regarding the possible causes of the small pox
88. Table 5.18: Showing information regarding the possible causes of the blindness
89. Table 5.19: Showing information regarding the possible causes of the epilepsy
90. Table 5.20: Showing information regarding the possible causes of the bristers
91. Table 5.21: Showing information regarding the possible causes of the cholera
92. Table 5.22: Showing information regarding the possible causes of the bone facture
93. Table 5.23: Showing information regarding the possible causes of the skin disease
94. Table 5.24: Showing information regarding the possible cause of the abortions
95. Table 5.25: Showing information regarding the possible causes of the rickets
96. Table 5.26: Showing information regarding the possible causes of the urinary tract infections (UTI)
97. Table 5.27: Showing information regarding the possible causes of the sexually transmitted infections (STI)
98. Table 5.28: Showing information regarding the possible causes of the asthma
99. Table 5.29: Showing information regarding the possible causes of the pneumonia
100. Table 5.30: Showing information regarding the possible causes of the infertility
101. Table 7.1: Distribution of respondents according to level of literacy
102. Table 7.2: Effect of education on housing facilities
103. Table 7.3: Effect of education on sanitation and personal hygiene
104. Table 7.4: Effect of education on economic condition
105. Table 7.5: Awareness related to reproductive track infections (RTI), sexually transmitted infections (STI), acquired immune deficiency syndrome (AIDS) and family welfare devices
106. Table 7.6: Source of knowledge to reproductive track infections (RTI), sexually transmitted infections (STI), acquired immune deficiency syndrome (AIDS) and family welfare devices
107. Total 7.7: Consultation to any are for the treatment of reproductive track infections (RTI), sexually transmitted infections (STI) and acquired immune deficiency syndrome (AIDS)
108. Table 7.8: Type of family welfare methods utilizes
109. Table 7.9: Effect of education on health care practices
110. Table 7.10: Effect of education socio-religious practices and taboo related to sickness
111. Table 7.11: Major health problems of the village
112. Table 6.1: Information regarding type of treatment received by the family members, during last one year
113. Table 6.2: Information regarding medicine used for the cure of fever
114. Table 6.3: Information regarding medicine used for the cure of malaria
115. Table 6.4: Information regarding medicine used for the cure of typhoid
116. Table 6.5: Information regarding medicine used for the cure of cough and cold
117. Table 6.6: Information regarding medicine used for the cure of Wounds, cuts and burns
118. Table 6.7: Information regarding medicine used for the cure of toothache
119. Table 6.8: Information regarding indigenous medicine
120. Table 6.9: Information regarding indigenous medicines used for the cure of head-ache
121. Table 6.10: Information regarding about indigenous medicines used for the cure of earache
122. Table 6.11: Information regarding indigenous medicines used for the cure of Oral ulcer
123. Table 6.12: Information regarding indigenous medicines used for the cure of blood dysentery
124. Table 6.13: Information regarding indigenous medicines used for the cure of Jaundice
125. Table 6.14: Information regarding indigenous medicines used for the cure of vomiting
126. Table 6.15: Information regarding indigenous medicines used for the cure of worms of stomach
127. Table 6.16: Information regarding indigenous medicines used for the cure of weakness or body ache
128. Table 6.17: Information regarding indigenous medicines used for the cure of skin diseases
129. Table 6.18: Information regarding indigenous medicines used for the cure of wounds due to itching i.e. Biskuti, or Baltodh
130. Table 6.19: Information regarding indigenous medicines used for the cure of scorpion sting
131. Table 6.20: Information regarding indigenous medicines used for the cure of snake bite
132. Table 6.21: Information regarding indigenous medicines used for the cure of dog bite
133. Table 6.22: Information regarding indigenous medicines used for the cure of bleeding
134. Table 6.23: Information regarding use the medicines for anti fertility purpose
135. Table 6.24: Information regarding use the medicines for re-fertility purpose
136. Table 6.25: Information regarding indigenous medicines used for the cure of body and stomach swelling
137. Table 6.26: Information regarding indigenous medicines used for the cure of fever with unconsciousness
138. Table 6.27: Information regarding use of indigenous medicine used for the cure of ‘heat of winter’
139. Table 6.28: Information regarding use the medicines for cracks of the heals
