CHAPTER 1

INTRODUCTION.....	1
--------------------------	----------

CHAPTER 2

REVIEW OF LITERATURE	5
2.1 INTRODUCTION	5
2.2 DIFFERENT LANDFILL LINERS	5
2.2.1 Rigid liners	5
2.2.2 Flexible liners	6
2.2.2.1 Natural Materials	6
2.2.2.2 Synthetic Liners	7
2.2.2.3 Composite liners	8
2.3 CLAY LINERS FOR WASTE CONTAINMENT	8
2.3.1 Compacted clay liners	9
2.3.2 Requirements of clay liners	10
2.4 PROPERTIES OF BENTONITE AND ITS APPLICATIONS AS LINER MATERIAL	11
2.4.1. Volume change behaviour of bentonite	12
2.4.2 Bentonite-sand mixtures	14
2.5 CRACK FORMATION IN SOILS	16
2.5.1 Types of cracks in soil	16
2.5.2 Mechanism of crack formation	17
2.5.3 Effect of Desiccation Cracking in Compacted Clay Liner	18

2.6 CASE HISTORIES ON DESICCATION INDUCED CRACKING ON COMPACTED CLAY LINERS	21
2.7 REINFORCED EARTH	22
2.7.1. Reinforcement with Discrete Random Fibres	23
2.8 STUDIES ON MARINE CLAYS	30
2.8.1 Properties of Marine Clays	30
2.8.2 Physical Properties of Cochin marine clays`	31
2.8.3 Compressibility characteristics	32
2.8.4 Shear strength characteristics	33
2.8.5 Retention studies	33
2.9. SCOPE OF WORK	34
2.10. OBJECTIVES	34

CHAPTER 3

MATERIALS AND METHODS	35
3.1 INTRODUCTION	35
3.2 MATERIALS	35
3.2.1 Soils used in the study	35
3.2.1.1 Bentonite	35
3.2.1.2 Marine clay	36
3.2.1.3. Soil of Kaolinite group	37
3.2.1.4 Sand	37
3.2.2 Amendments used in the study	38
3.2.2.1 <i>Polypropylene fibre</i>	38
3.2.2.2 <i>Nylon fibre</i>	41
3.3 TEST PROCEDURES ADOPTED	41
3.3.1 Experimental program	42
3.3.2 Preparation of samples	42
3.3.3 Drying procedure	42
3.3.4 Desiccation tests	44
3.3.4.1 Experimental set up	44
3.3.4.2 Determination of duration and number of wet/dry cycles	45

3.3.5 Measurement of Cracks	46
3.3.5.1 <i>Determination of crack intensity factor by digital image Processing</i>	47
3.3.5.1.2 <i>Analysis by MATLAB Version 7</i>	50
3.3.6 Compaction Test	51
3.3.7 Hydraulic conductivity tests	51
3.3.8 Tension tests	52
3.3.9 Unconfined compression test	53

CHAPTER 4

DEVELOPMENT OF DESICCATION CRACKS IN CLAY LINER SOIL	54
4.1 INTRODUCTION	54
4.2 SELECTION OF LINER SOILS FOR THE STUDY	54
4.2.1 Introduction	54
4.2.2 Bentonite enhanced sand mixture	55
4.2.3 Locally available materials	55
4.2.3.1 Sun dried marine clay	56
4.2.3.2 Sun dried marine clay as an additive to bentonite	57
4.2.4 Kaolinite soil	57
4.3 COMPACTION STUDIES ON LINER SOILS	57
4.4 DESICCATION TESTS	59
4.4.1 Introduction	59
4.4.2 Behaviour of the liner soil after compaction-drying cycle and wetting period	59
4.4.3 Development of desiccation cracks	59
4.4.3.1 Desiccation cracks in BES	60
4.4.3.1.1 <i>Quantification of cracks by digital image processing</i>	61
4.4.3.1.2 <i>Effect of number of wet/dry cycles on BES</i>	63
4.4.3.2 <i>Desiccation cracks in sun dried marine clay</i>	64

4.5 SUPERIORITY OF SUN DRIED MARINE CLAY OVER BENTONITE ENHANCED SAND MIXTURE	68
--	----

CHAPTER 5

EFFECTS OF FIBRES AND ADMIXTURE ON THE DESICCATIONCRACKS IN CLAY LINER SOIL	73
5.1 INTRODUCTION	73
5.2 RANDOMLY DISTRIBUTED FIBRE REINFORCEMENT	73
5.2.1 Compaction characteristics	73
5.2.2 Hydraulic conductivity	77
5.2.2.1 Effect of fibre inclusion on the hydraulic conductivity of bentonite enhanced sand mixture	78
5.2.2.2 Effect of fibre inclusion on the hydraulic conductivity of sundried marine clay	82
5.2.3 Shrinkage limit of amended soil	83
5.2.3.1 Effect of fibre inclusion on the shrinkage limit of BES mixture.	83
5.2.3.2 Effect of fibre inclusions on the shrinkage limit of sun dried marine clay	85
5.2.4 Strength characteristics	85
5.2.4.1 Strength characteristics of fibre amended BES	86
5.2.4.1.1 Effect of fibre inclusions on the unconfined Compressive strength of BES	86
5.2.4.1.2 Effect of type of fibre	89
5.2.4.1.3 Effect of fibre length	90
5.2.4.1.4 Effect of aspect ratio	92
5.2.4.2 Strength characteristics of Sundried Marine Clay amended with Fibres	93
5.2.4.2.1 Effect of fibre inclusion on the Unconfined compressive Strength of SMC	93
5.2.4.2.3 Effect of Type of Fibre	96

5.2.5 Superiority of Sundried marine clay over bentonite enhanced Sand Mixture	97
5.2.6 Tensile strength characteristics of liner soils amended with fibres	98
5.2.6.1 Tensile strength characteristics of fibre amended BES	99
5.2.6.2 Tensile strength characteristics of fibre amended sun dried marine clay	104
5.2.6.2.1 <i>Effect of fibre inclusion in the tensile strength of SMC</i>	104
5.2.6.2.2 <i>Effect of the fibrillated fibre structure</i>	107
5.2.6.3 <i>Superiority of sun dried marine clay over bentonite enhanced sand mixture</i>	109
5.2.7 Desiccation tests of fibre amended Sundried Marine Clay	112
5.2.7.1 Desiccation Tests on Fibre amended Sundried Marine Clay	112
5.2.7.2. Effect of Fibre inclusion in the Control of Desiccation Cracks	113

CHAPTER 6

SUMMARY AND CONCLUSIONS	117
6.1 INTRODUCTION	117
6.2 TECHNIQUES DEVELOPED FOR THE STUDY	117
6.2.1 Preparation of Specimens for Tests	118
6.2.2 Measurement of Cracks by Digital Image Processing	118
6.2.3 Experimental Setup Developed	119
6.3 DEVELOPMENT OF DESICCATION CRACKS IN LINER MATERIAL	119
6.3.1 Desiccation Cracks in Bentonite Enhanced Sand	119
6.3.2 Desiccation Cracks in Sundried Marine Clay	120

6.4 IMPROVEMENT OF LINER MATERIAL BY	
AMENDMENTS	121
6.4.1 Compaction Characteristics of Amended Soils	121
6.4.2 Hydraulic Conductivity of amended Soils	121
6.4.3 Improvement in Strength Characteristics by Amendment	122
6.4.3.1 Unconfined Compressions Strength of Amended Soil	122
6.4.3.2 Tensile Strength Characteristics of Amended soils	123
6.4.3.3 Desiccation Tests on Sundried Marine Clay Sample	124
