The present thesis entitled "Summability of Trigonometrical series" is the outcome of the researches done by the author since 1966, under the esteemed supervision of Dr. P.L. Sharma, Reader in Mathematics, University of Saugar.

The present dissertation consists of nine chapters and an appendix containing a published paper entitled "Absolute summability factors of a Fourier series". Also the IV chapter has been accepted for publication by the Cambridge Phil. Soc. in their journal. Briefly speaking, this makes an attempt to traverse the field of Analysis.

It is a pleasure to acknowledge my indebtedness to Dr. P.L. Sharma for his constant inspiration, valuable guidance and edifying criticism.

My thanks are also due to Prof. D.N. Misra, D.Sc. (Paris), Head of the Department of Mathematics, for his kind encouragement and help.

I extend my thanks to my research companions for the discussion on the subject matter and kind cooperation.

Finally I am grateful to the Ministry of Education, Government of India, for the award of Research Training Scholarship.

Department of Mathematics, University of Saugar, Sagar, M.P. (S.C.Kori)
