List of Tables with titles

Chapter I: Introduction

Table 1.1: Causes of cardiovascular diseases 1
Table 1.2: Some candidate genes for CVD 5
Table 1.3: Medications to raise HDL-C 48

Chapter II: Oxidation of Paraoxonase in serum differentially modifies its substrate specificities.

Table 2.1: Paraoxonase activity for different substrates in serum and HDL 79
Table 2.2: Elution of Paraoxonase from Cibacron blue sepharose column 80
Table 2.3: Correlation coefficient r for PON activities for different substrates in serum 81
Table 2.4: The correlations of HDL-C levels with PON activities 82

Chapter III: Effect of oxidation on its antioxidant activity

Table 3.1: Oxidation of HDL by AAPH, in the absence and presence of EDTA 108
Table 3.2: Effect of heat, trypsin treatment and fractional precipitation on the prooxidant activity of serum. Results are normalized to 100% 110

Chapter IV: Immunological reactivity of oxidized HDL and oxidized Apo A-I

Table 4.1: Subject Characteristics 138

Overall discussion, summary and conclusion

Table 5.1: Antiatherogenic activities of HDL 159
