Acknowledgements

It would not have been possible to complete this research endeavor without the help and support of the kind people, to only some of whom it is possible to give particular mention here.

Foremost, I consider myself very fortunate to have had Dr. K. Ramachandra Kini, Associate Professor, Department of Studies in Biotechnology, University of Mysore as my research supervisor. I remain indebted to him forever for initiating me into research and for his constant unconditional love and support. His timely insights, constructive criticisms and invaluable subject knowledge have been instrumental in the formulation and completion of the present thesis work. More than a guide I consider him a mentor, philosopher and friend in the truest sense.

I consider myself very lucky to have had the privilege of working under the guidance of Prof. Dr. Bruno M. Moerschbacher, Institut für Biologie und Biotechnologie der Pflanzen, Westfälische Wilhelms-Universität, Münster, Germany. I will always remain eternally grateful to him for his untiring support and excellent guidance both in securing financial assistance as well as in scientific research. In spite of his tight schedule and tons of paper work, I appreciate his efforts in making time for lively discussions. I also thank him for providing me the required resources and for the opportunity to stay amidst an acute shortage of work space. I am also appreciative of his patience towards my infinite failures. It would be unfair on my part if I don’t thank Dr. Wilfried Sagemann, Landwirtschaftskammer Nordrhein-Westfalen, Münster, Germany, who referred me to Prof. Dr. Moerschbacher.

No word would suffice to express my whole-hearted gratitude to Dr. Kini, Prof. Moerschbacher and my parents. I consider them to be the ‘God-Particles’ who have guided me through the longest and darkest of tunnels in my life.

I am very grateful to my professors, Prof. H. Shekar Shetty, Prof. H. S. Prakash, and Prof. S.R. Niranjan, Department of Studies in Biotechnology, University of Mysore, for their consistent support, encouragement and help throughout my stay at the department.

My sincere thanks to Prof. Bharathi P. Salimath, Dr. H. S. Aparna, Dr. S. Umesha, Dr. Geetha N. P. Department of Studies in Biotechnology, University of Mysore, for their words of encouragement.

This thesis would definitely not have been possible without the help, support and guidance of Dr. Stephan Kolkenbrock, Post-Doctoral Fellow, Institut für Biologie und Biotechnologie der Pflanzen, Westfälische Wilhelms-Universität, Münster, Germany. I am very thankful to him for his time and patience, in spite of his busy schedule. I really owe a lot to him for my present status as a researcher.

A very special thanks to the post-doctoral fellows Dr. Nour Eddine El Gueddari, Dr. Martin Wagenknecht and Dr. Sonia Chachra for all the support, productive discussion and great time we had together. I also acknowledge the support of Dr. Fabrice Brunnel, Dr. Caroline Richter and Dr. Ratna Singh.

A very hearty word of credit is reserved for Dr. Mareike Dirks-Hofmeister, Dr. Sabine Fehser with whom I shared the lab in Germany. I am very grateful to them for their friendship, advice, and assistance. It was great working with them.

I would also like to extend my gratitude to Ms. Janina Hossbach, Mr. Frank Bernard for all their help and guidance.

I also want to thank my all my other colleagues in Germany, Mr. Stefan, Ms. Sarah, Ms. Christine, Mr. Sven, Mr. Philip, Ms. Stephanie, Ms. Rebecca, Mr. Praveen, Mr. Nagaraju, Ms. Malathi, Ms. Teja and Ms. Shoa for making my stay a very pleasant and fruitful one.
Special thanks are also due to all the technical and office staff in Germany, especially, I am grateful to Ms. Ursula, Ms. Marita, and Mrs. Lisa for their untiring help.

I acknowledge the technical support extended to me during transient expression studies in plants by Dr. Antonia Ernst, Dr. Christian Schulze Gronover, Dr. Boje Müller and Dr. Andrea Hillebrand, from Prof. Pruefer’s group, Muenster, Germany. I also thank Mrs. Susan Hawat from Prof. Hippler’s group, Muenster, Germany and Mr. Gnanesh Kumar, Department of Biochemistry, University of Hyderabad for the mass spectrometric analyses of my protein samples.

My sincere acknowledgements also go to Dr. Shailasree Sekhar, Dr. Niranjan Raj, Dr. Uday Shankar, Dr. Chandra Nayak, Dr. Sharath Chandra Rao, Dr. Manjunath, Dr. Sudisha, Dr. Deepak, Dr. Sujeeth Neerakkal, Dr. Ranjini, Dr. Vanitha and Dr. Hariprasad for their help and moral support.

Very special thanks go to Mr. Melvin Prasad, Ms. Veena, Mr. Anup, and Mr. Shrisha for their invaluable support.

I also thank Mr. Rohit, Mr. Rakesh, Mr. Nishanth, Mr. Sachin, Mr. Chandan, Mr. Chandrashekar, Mr. Harsha, Mr. Shivprasad, Mr. Sunil, Mr. Chetan, Mr. Uday, Mr. Naveen, Mr. Aiyaz, Mr. Diwakar, Mr. Brijesh, Mr. Sebastian, Mr. Satish, Ms. Sunaina, Ms. Rashmi and Ms. Mamatha for their timely help.

I would also acknowledge the help from my other present and former department colleagues and office staff without their names mentioned here due to lack of space.

A special mention has to be made of my friend Mr. Madhusudhan M.C., for his encouragement and timely support.

Though impossible, I still would make an attempt to express my sincere gratitude to my parents for all their love and support. I sincerely apologize to my mentors and parents for all my blunders and eccentricities.

I am very much obliged to thank all my teachers and authors of all the books and articles for their part in enriching my knowledge and shaping my thinking.

I gratefully acknowledge the infrastructural facilities created at the University of Mysore under the Institution of Excellence Scheme by the Ministry of Human Resource Development and University Grants Commission, Government of India, which have been used extensively in the present research.

Finally, I will remain indebted forever to Department of Biotechnology, Government of India, India and European Molecular Biology Organization, Heidelberg, Germany for the financial support in the form of research fellowships. I also thank my parent department and university for the resources.

For any errors or inadequacies that may still remain in this work even after microscopic scrutiny, the responsibility entirely rests on me.

S. Ashok Prabhu
