LIST OF FIGURES

Figure 1  Synthesized biogenic silver nanoparticles observed strongly in the range of 400 - 450 nm in the visible region in UV spectra

Figure 2  UV spectrum of biogenic silver nanoparticles formed at characteristic wavelength at 422 nm with increase in wavelength at regular time intervals

Figure 3  Fourier Transform Infrared spectrum of biogenic silver nanoparticles

Figure 4  X-Ray Diffraction pattern of biogenic silver nanoparticles showing characteristics peaks centered indexed to the crystalline planes (111), (200) and (220) of face centred cubic silver

Figure 5  Energy Dispersive Spectrum of biogenic silver nanoparticles revealed the presence of high amount of silver

Figure 6  UV spectrum of optimization of biogenic silver nanoparticles under different pH

Figure 7  UV spectrum of optimization of biogenic silver nanoparticles at different incubation timings

Figure 8  UV spectrum of optimization of biogenic silver nanoparticles at different temperatures

Figure 9  UV spectrum of optimization of biogenic silver nanoparticles at different concentrations of silver nitrate solution

Figure 10 UV spectrum of optimization of biogenic silver nanoparticles at different concentration ratios of plant rhizome extract and silver nitrate

Figure 11 Change in membrane permeability of bacterial cells under 10 μg/ mL concentration of biogenic silver nanoparticles and silver nitrate treatment

Figure 12 Respiration activity of Staphylococcus aureus under 10 μg/ mL concentration of biogenic silver nanoparticles and silver nitrate treatment

Figure 13 Growth curves of Staphylococcus aureus bacterial cells exposed to 10 μg/ mL concentration of biogenic silver nanoparticles and silver nitrate

Figure 14 Growth curves of Escherichia coli bacterial cells exposed to 10 μg/ mL concentration of biogenic silver nanoparticles and silver nitrate
**List of Figures**

**Figure 15**  Effect of 10 μg/mL concentration of biogenic silver nanoparticles and silver nitrate on protein leakage from bacterial cell membranes

**Figure 16**  Minimum inhibitory concentrations (MIC) of bacterial cells exposed to different concentrations of biogenic silver nanoparticles

**Figure 17**  Minimum inhibitory concentrations (MIC) of bacterial cells exposed to different concentrations of silver nitrate

**Figure 18**  UV spectrum showing no detection of biogenic silver nanoparticles in ISO artificial sweat formulation (pH 5.5) due to the absence of absorbance peak of 390 to 450 nm which is characteristic region of silver

**Figure 19**  Fourier Transform Infrared Spectra analysis of untreated fabric and biogenic silver nanoparticles treated fabric

**Figure 20**  Energy Dispersive Spectrum of fabric treated with biogenic silver nanoparticles showing the presence of high amounts of silver

**Figure 21**  UV spectra showing the photocatalytic degradation of commercial dye effluent using biogenic silver nanoparticles in 60 minutes

**Figure 22**  UV spectra showing the photocatalytic degradation of Brown Direct dye using biogenic silver nanoparticles in 60 minutes

**Figure 23**  UV spectra showing the photocatalytic degradation of Procion Fuchsia MX-8B dye using biogenic silver nanoparticles in 60 minutes

**Figure 24**  UV spectra showing the photocatalytic degradation of Procion Navy Blue MX-2G dye using biogenic silver nanoparticles in 60 minutes

**Figure 25**  UV spectra showing the photocatalytic degradation of Reactive Orange 16 dye using biogenic silver nanoparticles in 60 minutes

**Figure 26**  UV spectra showing the photocatalytic degradation of Reactive Yellow 17 dye using biogenic silver nanoparticles in 60 minutes

**Figure 27**  UV spectra showing the photocatalytic degradation of Procion Bright Turquoise MX-G dye using biogenic silver nanoparticles in 60 minutes

**Figure 28**  Reduction in BOD and COD levels in commercial textile dye effluent after photocatalytic degradation using biogenic silver nanoparticles with in 60 minutes

**Figure 29**  Swelling studies in biogenic AgNP beads and Simple beads
Figure 30  Fourier Transform Infrared analysis of biogenic AgNP beads and Simple beads before and after treating aerobic sludge

Figure 31  Seed Germination in *Trigonella foenumgraecum* Linn. seedlings under various concentrations of biogenic silver nanoparticles and silver nitrate

Figure 32  Germination Index (%) on day 2 and day 4 in *Trigonella foenumgraecum* Linn. seedlings under various treatments

Figure 33  Effects on plant height under various treatments for 120 days

Figure 34  Effects on plant weight under various treatments for 120 days

Figure 35  Effects on total number of leaves under various treatments for 100 days

Figure 36  Effects on total number of flowers under various treatments for 80 days

Figure 37  Effects on total number of pods under various treatments for 110 days
