I would like to express my deepest gratitude to my revered, learned and eminent supervisor, Prof. A. G. Vedeshwar for his encouragement, scholarly guidance, and persistent motivation. His deep knowledge and gracious approach towards the subject has always helped me immensely to overcome the challenges faced during research work. This thesis would have not been possible without his constant monitoring, advice, unsurpassed knowledge and invaluable direction. His humble and polite nature, conviction and ideology of thoughts will always inspire me throughout my life to continue work with his noble belief.

I am also extremely indebted to Prof. R. P. Tandon, Head of the Department, for providing me an opportunity to work with him in the department and helping throughout this research work. His every day increasing support has helped me to see life and science in their full depth. He remained a supporter and provided insight and direction – right from the beginning to the end in defining the objectives of research work and fulfilling it. His understanding about physics is incomparable. His energetic personality has always motivated me to excel and explore.

I am greatly thankful to Dr. N. C. Mehra for his continuous support and my senior lab members (Dr. V. K. Sachdev, Dr. Manoj Arora, Dr. Swati Arora, Dr. Pankaj Kumar, Dr. Anupama Sachdeva, Dr. Prikshit Gautam and Dr. Sudeshna Bhattacharya).

I would like to thank my friend Dr. Raman Kashyap for his timely support and advice. Thanks are due to Ms. Richa Sharma, Ms Poonam Pahuja, Ms. Vinamrita Singh, Ms. Monika Shahi for their help in editing of thesis. I appreciate help extended by Ms. Shalini Saxena, Mr. Sushil Kumar Ranjan, Mr. Surender Kumar Sharma, Mr. Rajveer Singh, Mr. Deepak Kumar, Dr. Anuj Dhiman, Dr. Arti Gupta and Dr. Praveen Garg during the course of thesis work.

I thank staff in my lab, University Science and Instrumentation Centre (USIC) for their assistance.
I thank Department of Science and Technology (DST) and Jawaharlal Nehru Memorial Fund for providing me scholarship during my research work.

I express my deepest regards for my respected parents whose hard work and sacrifices paved the way for my journey to this moment and will light the road for my future journey.

I will be failing if I do not recognize the contribution of my beloved wife, Shalini, whose constant support, encouragement, love and care allowed and inspired me to complete this work. And at this juncture, I express my love for centre of our (me and Shalini) life, Mrigank, My Son who brought cool breeze in our life.

Last but not the least; I bow before almighty God to express my deepest gratitude for bestowing me with his blessings and for giving strength to successfully complete this work.

Rakesh Kumar Mishra
