List of Tables v  
List of Figures vii  
List of Maps viii  
List of Appendices

### Chapter-1 Notion of Quality of Life in the Urban Context 1-24

1.1 Introduction- the urban context of quality of life  
1.2 ‘Quality of life’- as variously understood  
1.3 The interlinked concepts -‘Quality of life’ and ‘Well-being’  
1.4 Complexity and vagueness in the concepts of ‘Well-being’ and ‘Quality of Life’  
1.4.1 Fuzzy sets theory- a tool to account for vagueness and complexity  
1.5 Research questions and overview of thesis  
1.5.1 Research questions  
1.5.2 Objectives of the study  
1.5.3 Hypotheses  
1.5.4 Overview of thesis

### Chapter-2 The Setting and Field Survey 25-39

2.1 Brief history of Delhi  
2.2 Phases in the development of modern Delhi  
2.3 Area of Delhi  
2.3.1 Expansion of urban area in Delhi  
2.4 Urbanization in Delhi
2.5 Civic administrative divisions in National Capital Territory of Delhi

2.6 Survey

Chapter-3 An Analytical Framework to Capture Vagueness: Fuzzy Measurement of Poverty and Vulnerability

3.1 Introduction
3.2 Vagueness of poverty, fuzzy set theoretic poverty measures and vulnerability
3.3 An application of the concept of vulnerability using fuzzy set theoretic poverty measures
3.4 Conclusions

Chapter-4 Quality of Life: A Human Well-Being Perspective

4.1 Conceptualization and measurement of well-being: a review of different approaches
4.2 Capability Approach: theory and model
   4.2.1 Measuring well-being using fuzzy sets theory
      4.2.1.1 Estimation of membership functions
      4.2.1.2 Aggregating subsets to arrive at functionings
   4.2.2 Identifying and representing well-being dimensions: a list of relevant functionings and related indicators
      4.2.2.1 Identifying functionings by factor analysis
4.3 Methods
4.3.1 The data base
4.3.2 Functionings’ assessment according to factor analysis
4.3.3 Applications of fuzzy sets theory to well-being measurement

4.4 Results of the model
4.5 Conclusions

Chapter-5 Quality Of Life, Spatial Location and Access of Households to Basic Services

5.1 Estimating quality of urban life: a review of studies using different perspectives
5.2 Methods
   5.2.1 The data base: urban Delhi
   5.2.2 Urban domains’ assessment using factor analysis: the key basic services
   5.2.3 Application of the fuzzy sets approach to measure quality of life based on access to basic services
5.3 Model results
5.4 Conclusions

Chapter-6 Synthesis and Conclusions

6.1 A synthesis of different accounts of quality of life
   6.1.1 An assessment of living conditions with an account of the vagueness of poverty
6.1.2 Quality of life examined in terms of individual assessment of well-being
6.1.3 Quality of life represented by the access to basic services to households

6.2 Conclusions
6.2.1 An assessment of poverty to analyze living conditions
6.2.2 An individual assessment of well-being
6.2.3 Access to basic services across spatial locations
6.2.4 Policy implications
