ACKNOWLEDGEMENTS

First and foremost, I would like to express my sincere gratitude to my supervisor Dr. S. K. Muttoo for his humility, patience and fullest cooperation during the supervision of my research. His guidance, encouragement and support were available at any time when needed. Our discussions, ideas and suggestions have played a major role in the completion of my thesis.

I express my deepest appreciations to the faculty members of Department of Computer Science, University of Delhi, especially Shri P.K. Hazra, Dr. Naveen Kumar and Dr. Punam Bedi for their cooperation and friendly advice during the research work. I am also thankful to the Office staff of Department of Computer Science and staff of Computer Lab for providing me help whenever I needed.

I would like to convey my appreciativeness to Prof. Ivan W. Selesnick, Polytechnic Institute of New York, Prof. Nick. G. Kingsbury, University of Cambridge, who are pioneers of Complex Wavelet Transforms, for providing software and giving permission to use their necessary tools. I further wish to thank Dr. S.K.Pal, DRDO, Delhi, Dr. Anand Gupta NSIT, Delhi and Dr. Satish Verma, SGTB College, University of Delhi for their useful suggestions during my thesis. During my period of research, I got a chance to come in contact with students who have been helpful in discussions and simulating the programs. Some of them who deserve special thanks are Amogh Batra, Heejoon Lee, Elham Moinaddini and Shweta Chaudhary of University of Delhi; Ram Karan, Kumar Sarth and Rohit Chaudhary of D.C.E. Delhi; Eepsa Malhotra, Geeta Bansal and Aviral Lamba of NSIT, New Delhi.

My sincere thanks are owing to Principal, Dr. Vijay Laxmi Pandit, Rajdhani College and all staff members of the college for their kind support that has helped me to perform my duties in the college as well as doing research work.

I would further wish to thank all those people who were helpful to me in my research work While naming all of them is difficult, I take this opportunity to thank retired Prof. P.K. Kapoor, Department of Operational Research, University of Delhi, Dr.
M.N. Hoda, Director, BVICAM, New Delhi and Dr. Naresh Chand Jain, BVICAM, New Delhi,

My first paper presentation at the National conference ISDIKS, 2007 organized by Amrita University at Cochin and meeting a group of scholars enthusiastic to do something were the most memorable moments of my life that persuaded me further to work. I would like to thank to the organizer of ISDIKS, 2007 for giving me the opportunity to meet and learn from all of them.

I would also like to acknowledge the support that I received from UGC who sponsored my visit to Wuhan, China to present a research paper on ‘Distortionless data hiding based on Slantlet Transform’, in Nov., 2009. I consider myself fortunate to have a visit to Wuhan and be associated with a very close group of friends doing research in information security at different universities of China. I am therefore thankful to the organizer of MINES 2009 conference at Wuhan, China on Nov. 18-20, 2009.

Finally, I wish to thank my family for all the support, for being patient, for bearing with me and for understanding they have given me throughout the years.

Sushil Kumar
Associate Professor
Department of Mathematics
Rajdhani College
University of Delhi
New Delhi
