ACKNOWLEDGEMENT

I am greatly indebted to my guide and supervisor Dr. M. N. Narayanan Namboodiri, Lecturer, Department of Mathematics, Cochin University of Science and Technology, Kochi, who introduced me to the interesting study of Approximation Methods, for his sincere guidance and kind encouragement throughout the period of my research and for the academic freedom I enjoyed during my work with him.

I place on record my gratitude to Prof. A. Krishnamoorthy, Head, Department of Mathematics, Cochin University of Science and Technology for his continuous encouragement and to the former Head Prof. T. Thrivikraman for his moral support and help. I also thank the former Heads of the Department Dr. M. Jathavedan and Dr. A. Vijayakumar and all the other members of the faculty of Mathematics for their kind help during my research. My thanks are also due to the Librarian and the members of the administrative staff.

I should like to thank the University Grants Commission for making available to me a two year fellowship for my Ph.D. work under Faculty Development Programme and the Management, Correspondent- Secretary and the Principal of Scott Christian College, Nagercoil for enabling me to pursue my research programme at Cochin University of Science and Technology.

I am grateful to Prof. B. V. Limaye (IIT Bombay), Prof. A. Bottcher (Germany) and Prof. C. W. Groetsch (USA) who helped me with their clarifications on certain aspects of my study through e-mail.

I am specially indebted to the organizers of (i) 11th Ramanujan Symposium on Recent Trends in Operator Theory, held at the Ramanujan Institute of Advanced study in Mathematics, University of Madras (3-5 March, 2004), (ii) National Seminar on Algebra, Analysis and Discrete Mathematics, held at the Department of Mathematics, University of Kerala, Trivandrum (12-14 January, 2005), (iii) LUMS International Conference on Mathematics, held at the Department of Mathematics, Lahore University of Management Sciences, Lahore, Pakistan (27-30 November, 2005), (iv) International Conference on Functional and Numerical Analysis (TOFNA2005), held at the Department of Mathematics, IIT Bombay (7-9 December, 2005) and (v) International Conference on Mathematics and Computer Science, held at the Department of Mathematics, Loyola College, Chennai (1-3 March, 2007) for providing me with an opportunity for presenting the papers related to my work and to all those scholars, especially to Prof. S. H. Kulkarni, IIT Madras, for their comments and suggestions which helped me greatly in my research.

My fellow scholars at the Department of Mathematics, Cochin University of Science and Technology, and the colleagues in my own department and friends in our College need a special mention for their support and encouragement.

Let me also thank Mr. R. Karthikeyan, Proprietor, Quality Datamill Pvt. Ltd., Chennai and his staff for the La Tex typesetting of the thesis.

Needless to say that the comfort and encouragement given by the members of my family helped me immensely to carry out my task. A big thanks to each one of them.

J. Robert Victor Edward
