ACKNOWLEDGEMENTS

Though only my name appears on the cover of this thesis, I could never have reached the heights or explored the depths without the help, support, guidance and efforts of a lot of people. I owe my gratitude to all those people who have made this thesis possible.

First and foremost I offer my sincere gratitude to my guide, Dr. V. Ramalingam, Professor, Department of Computer Science and Engineering, who supported me throughout my research with patience and knowledge. I have been amazingly fortunate to have a guide who gave me the freedom to explore on my own and at the same time the guidance to recover when my steps faltered. His understanding, encouragement and personal guidance have provided a good basis for the present thesis.

I am grateful to Prof. B. Palaniappan, Head of the Department of Computer Science and Engineering, and Dean, Faculty of Engineering and Technology, for his constant encouragement. I thank him for the excellent research environment he has created to learn and pursue research work.

I warmly thank Dr. S. Palanivel, Reader, Department of Computer Science and Engineering, for his valuable advice and friendly help. He has always been there to give advice. His extensive discussions around my work and his detailed and constructive comments have been very helpful for this study.

I am also grateful to Dr. A. M. Sameeullah, former Professor of Computer Science and Engineering, Faculty of Engineering and Technology, Annamalai University and Member Secretary, Tamil Nadu State Council for Technical Education, Chennai, who supported and encouraged me to complete the research work.

I would like to thank my research colleagues Mrs. T. S. Subashini, Mrs. M. Kalaiselvi Geetha, Mrs. P. Dhanalakshmi and Mr. M. Balasubramanian, for their numerous discussions and lectures on related topics that helped me to improve my knowledge.
in the area.

I sincerely thank my friend Mrs. B. Kirubagari for sparing her time with me to give moral support and help. Her approach towards life boosted my self-confidence and also discussions with her encouraged me all the time.

I would like to thank my friend Mrs. G. Arulselvi profusely. We have a unique bonding that helped us to study together during exams and discuss various technical stuffs. It is always a pleasure for us to study together. We always make a best combination in group studies and that helped both of us to score well in various exams.

My thanks are also due to my nephew Mr. P. Prakash for helping me to collect research papers and my niece Ms. P. Sujitha for her help while preparing the user interface.

Most importantly, none of these would have been possible without the love and patience of my family. Words cannot describe the encouragement, affection and love of my husband Mr. S. Sekar. I thank him for all the help, care and moral support he provided.

My loving thanks are due to my daughters S. Susmitha and S. Reshma. Susmi was alone most of the time at home due to my research. As a mom I did not do anything for Reshma; she missed everything from me.

I would like to thank my parents and my brothers, especially my brother Mr. S. Gopal for making me what I am today.

I would like to make a special mention of the extreme support given by my sisters Mrs. S. Palaniammal and Mrs. S. Selvi during the most critical part of my life. Without them, nothing is possible in my life; they are the gifts given by God in my life. I also thank all other members of my family, and my friends.

S. Jothilakshmi
