CONTENTS

INTRODUCTION .......................................................................................... 01 ·82

1.1 Portland cement 01
  1.1.1 History 01
  1.1.2 Chemical composition 02
  1.1.3 Manufacture of Portland cement 03
  1.1.4 Hydration of cement 06
  1.1.5 Types of Portland cement 07

1.2 Cement concrete 12
  1.2.1 Definition 13
  1.2.2 Composition 13
  1.2.3 Components 15

1.3 Cement concrete durability 18
  1.3.1 Frost 19
  1.3.2 Corrosion 20
  1.3.3 Sulphate attack 21
  1.3.4 Seawater attack 21

1.4 Admixtures of cement concrete 22
  1.4.1 Water reducing agents 23
  1.4.2 Air entraining agents 24
  1.4.3 Accelerators and retarders 25
  1.4.4 Plasticizers 27
  1.4.5 Other chemical admixtures 27

1.5 Polymers 28
  1.5.1 Introduction 28
  1.5.2 Properties and behaviour of polymers 30
  1.5.3 Classification of polymers 35

1.6 Polymer composites 46

1.7 Use of polymers in concrete 47
  1.7.1 Polymers as cement admixtures 48
  1.7.2 Cement concrete-polymer composites 50
Chapter 2

CEMENT COMPOSITES OF THERMOPLASTICS AND RUBBERS ............ 83 - 122

2.1 Introduction 83

2.2 Materials and specifications 84
2.2.1 Portland cement 84
2.2.2 Thermoplastics 85
2.2.3 Rubbers 86

2.3 Polymer cement formulations 87
2.3.1 Rubber latex prevulcanization and mixing 87
2.3.2 Mixing of cement and thermoplastics 91
2.3.3 Polyvinyl alcohol cement composites 94
2.3.4 Curing 96

2.4 Experimental techniques for property evaluation 96
2.4.1 Bulk density measurements 96
2.4.2 Compressive strength 96
2.4.3 Chemical resistance 97

2.5 Results and discussions 98
2.5.1 Effects of addition of polymers 98
2.5.2 Mixing of various polymers with cement 99
2.5.3 Mechanical properties 99
2.5.4 Chemical resistance 110

2.6 Conclusion 118

# CEMENT COMPOSITES OF THERMOSETTING POLYMERS

3.1. Introduction 123

3.2. Experimental 125
   3.2.1. Materials 125
   3.2.2. Preparation of resins 128
   3.2.3. Formulations 133
   3.2.4. Curing 140
   3.2.5. Evaluation of properties of polymer cement composites 140

3.3. Results and discussion 142
   3.3.1. Mixing 142
   3.3.2. Bulk density 144
   3.3.3. Pulse velocity measurements 146
   3.3.4. Compressive strength 149
   3.3.5. Chemical resistance of the composites 152

3.4. Conclusion 161

# MICROSTRUCTURAL STUDIES

4.1. Introduction 165

4.2. Experimental techniques 166
   4.2.1. Thermo gravimetric analysis 166
   4.2.2. Soxhlet extraction 166
   4.2.3. Ethylene diamine tetra acetic acid titrations 168
   4.2.4. Scanning electron microscope studies 168

4.3. Results and discussion 169
   4.3.1. Thermal analysis of polymer cement composites 169
   4.3.2. Soxhlet extraction 182
   4.3.3. EDTA titrations 184
   4.3.4. Scanning electron micrographs 184

4.4. Structure–property relationship 200
4.4.1 Polyvinyl alcohol and polyvinyl acetate
4.4.2 Rubbers
4.4.3 Phenolic resins
4.4.4 Molecular weight of PEG

4.5. Conclusions
