ACKNOWLEDGEMENT

This dissertation would not have been possible without the guidance and contributions of many different people who in their different ways have made this achievable. I take this opportunity to wholeheartedly thank and give credit to all the individuals who have provided me with their valuable support throughout the tenure of my Ph.D.

First and foremost, I would like to express my profound gratitude to my extremely supportive and patient supervisor, Dr. R. Nagarajan for sharing his expertise and unsurpassed knowledge. His intellectual guidance, innovative and constructive ideas, and enthusiasm for research which was contagious and motivational, thereby making my research experience productive and stimulating. He encouraged me to not only grow as an experimentalist and a chemist, but also as an instructor and an independent thinker. It was indeed my privilege to work under him. I am also thankful to Dr. S. Uma as without her inspiration, and efforts to explain things clearly and simply, this thesis would have been unattainable. Apart from the numerous scientific resources, she also provided continuous encouragement and sound advice throughout this period of research. I would like to thank Dr. R. Gupta, the member of my thesis advisory committee, for his insightful comments and time.

I sincerely thank to our collaborators Dr. G. V. Prakash, Nanophotonics Lab, IIT-Delhi for carrying out optical measurements during my Ph. D. work. I would also like to thank the members of Nanophotonics Lab, Dr. Subrata Das, Mr. Nageswara Rao Kotla, Mr. Shahab Ahmad, Mr. Allu Amarnath Reddy and Mr. Packiya Raj for helping me in recording the optical measurements. My sincere thanks to Dr. Govind, Dr. P. Senthil Kumar and Mr. Khalid Pasha for helping in recording the XPS measurements and Prof. A. K. Tyagi, BARC, Mumbai for surface area measurements.

I would like to express my gratitude to the past and the present Heads of the Department, Department of Chemistry, Prof. A. K. Bakshi, and Prof. S.M.S. Chauhan (Present) for supporting and providing me with the facilities required for
my research. I would also like to thank all the administrative and technical staff members, especially Mr. Baldev of the Department of Chemistry for their help and cooperation.

I am grateful to the instrumentation facilities of the University Science Instrumentation Centre (USIC), University of Delhi; M. Tech. Nanoscience and Technology (NSNT), University of Delhi; Indian Institute of Technology (IIT) Delhi; Indian Institute of Technology (IIT) Roorkee; Indian Institute of Technology (IIT) Kharagpur and Indian Institute of Science (IISc), Bangalore.

The members of the Materials Chemistry Group have contributed immensely to my professional and personal time here at the University of Delhi. I owe a great deal of thanks unanimously to my seniors cum trainers, Dr. Neetu Tyagi Sharma, Dr. Epsita Ghanti Bhattacharjee and Dr. Mamta Kharkwal for always being there for me, be it at professional or personal level, especially during my training times. I extend my heartfelt thanks to Dr. Vaishali Thakral Arora who always tried to help me and solve my scientific problems with her positive efforts and energy. I am greatly appreciative to my other seniors Dr. Jyoti, Dr. Nobel Tomar Antil, Dr. Yogesh Kumar Sharma and Dr. Manoj Trivedi for enduring a continuous support during this research tenure. I am indebted to my colleagues, Mr. Prashant Kumar, Mr. Vinod Kumar, Miss Neha Bhardwaj and Miss Meenakshi Gusain for their unremitting support and providing a stimulating and fun environment learn and grow. I would also like to thanks my juniors, Miss. Poonam, Miss. Pooja, Miss. Pinki, Miss Akansha, Miss. Vidhu and Miss. Meenakshi for their incessant support and assistance. I also convey my sincere thanks to the very diligent lab attendants Mr. Bijender Negi, Mr. Rakesh Kumar and Mr. Hemant Kumar for their help and assistance.

I gratefully acknowledge the funding sources that made my Ph.D. work possible. My sincere thanks go to the Council of Scientific & Industrial Research (CSIR), India and Department of Science and Technology (DST) for the financial support.
I would like to express my unending gratitude to my family for all their love and encouragement. I wholeheartedly thank my parents, Mr. Shakeel Ahmad and Mrs. Shahnaaz Parveen who brought me to this world, raised me, built my love of science and supported me in all my pursuits. My affectionate brother Mr. Naved Ahmad who has been a companion throughout my life, my sisters and brothers in laws, Mrs. Shazia and Mr. Naved Zia; and Mrs. Fozia and Mr. Adil Rasheed and my younger brother Faizan Ahmad for always being asides me, helping me psychologically, emotionally, physically and materially to overcome all the obstacles and hurdles I faced in my life. Also, I wish to thank my entire extended family, in particular my parents in law, Mr. Syed Naushad Ali and Late Mrs. Naima Naushad for their strong belief and inspiration. Most of all, I thank my loving wife Mrs. Seemien N. Ahmad, for her unequivocal support and for her meaningful presence in my life.

I wish to express my recognition to my friends, Mr. Sohail Ahmad, Mr. Boya Rajashekkhar, Mr. Abhitosh Kedia, Mrs. Yamal Gupta, Dr. Meraj and Dr. Birla who provided me with a lot of literature and were always there for me through thick and thin. Words fail to express my love and appreciation to my friends, Mr. Naved, Mr. Marahim, Mr. Parikh and Mr. Ovais who always stood by me to share my happiness and at the same time listen to my woes and qualms.

Lastly, I would like to acknowledge everyone who was important towards the successful realization of my thesis, as well as express my sincere apologies for inadvertently omitting anyone being an inarticulate science person.

(SHAHZAD AHMAD)
