ACKNOWLEDGEMENT

It is my prime duty to express my gratefulness to the Almighty for his blessings. Without his divine grace and blessings, nothing would have been possible.

I feel pride to express my sincere thanks and deep sense of indebtedness to my research supervisor Dr. R. Krishnamoorthy, Head, Department of Information Technology and Dean, Bharathidasan Institute of Technology, Bharathidasan University, Tiruchirappalli for suggesting this topic and for his valuable guidance, many fruitful discussion and constructive encouragement throughout the study and preparation of this thesis.

I humbly place my sincere thanks to Prof. B. Palaniappan, Professor and Head, Department of Computer Science and Engineering and Dean, Faculty of Engineering and Technology for permitting me to successfully carry out this research investigation.

But for the sterling support of my family, I would not have been able to complete this research work. I am profoundly indebted to my wife V. Kothainayagi, my beloved son Sri. Omprakash and my beloved daughter Selvi. Sumeetha for letting me occupy, for a spell, my own existential apace away from them.
