CHAPTER - 1 : INTRODUCTION

1.1 Brief History of the Chambal Complex

1.2 Selection of the Study Area

1.3 Location and Extent of the Study Area

1.4 Accessibility

1.5 Period of Study

1.6 Previous Studies

1.7 Methods of Investigation

CHAPTER - 2 : PHYSIOGRAPHY OF THE CHAMBAL AND SIND DRAINAGE-BASINS

2.1 Malwa Plateau 15
2.2 Madhya Bharat Pathar 16
2.3 East Rajasthan Uplands 17
2.4 Aravalli Range 18
2.5 Chambal Drainage-Basin 18
2.6 Sind Drainage-Basin 21
2.7 Vegetation 23
2.8 Physiographic Setting of the Chambal Command within the Drainage Basins. 24
2.9 Origin of the Ravines 31

CHAPTER - 3 : HYDROMETEOROLOGICAL ASPECTS 35-55

3.1 Climate 35
3.2 Temperature 35
3.3 Pan-Evaporation Losses 38
3.4 Humidity 39
3.5 Rainfall 42
3.6 Residual Mass Curves 50
CHAPTER 4: GEOLOGICAL ASPECTS OF THE CHAMBAL AND SIND DRAINAGE-BASINS

(A) CHAMBAL DRAINAGE-BASIN

4.1 Bundelkhand Granite and Gneiss

4.2 Aravalli Super Group

4.3 Gwalior Group

4.4 Vindhyan Super Group

4.5 Bagh Beds

4.6 Deccan Traps

4.7 Alluvium

(B) SIND DRAINAGE-BASIN

4.8 Bundelkhand Granite and Gneiss

4.9 Gwalior Group

4.10 Vindhyan Super Group

4.11 Deccan Traps

4.12 Alluvium

4.13 Broad Aspects of Hydrological Properties of Rock Formations
CHAPTER - 5:  AQUIFERS OF THE ALLUVIUM OF THE INVESTIGATED AREA

5.1 Groundwater Inventory 80
5.2 Subsurface Geology 81
5.3 Fence Diagram 103
5.4 Geophysical Well Logging 105
5.5 Alluvial Basement Topography 110
5.6 Mechanical Analysis of Aquifer Materials 112
5.7 Porosity, Specific Yield and Specific Retention 114
5.8 Coefficients of Transmissibility and Storage 115

CHAPTER - 6: OCCURRENCE AND MOVEMENT OF GROUNDWATERS 125-135

6.1 Groundwater Level Maps 125
(A) CHAMBAL-KUNHARI DOAB 126
  6.1.1 Pre-Monsoon Groundwater Level Map 126
  6.1.2 Post-Monsoon Groundwater Level Map 127
  6.1.3 Groundwater Level Fluctuation Map 128
  6.1.4 Depth to Groundwater Level Map 128
(B) KUNVARI-SIND DOAB

6.1.5 Pre-Monsoon Groundwater Level Map 129
6.1.6 Post-Monsoon Groundwater Level Map 131
6.1.7 Groundwater Level Fluctuation Map 131
6.1.8 Depth of Groundwater Level Map 132

6.2 Pressure-Surface Map 132
6.3 Occurrence of Groundwater 133

CHAPTER 7: GROUNDWATER RESOURCES OF THE ALLUVIUM OF THE STUDY AREA 136-149

7.1 Annual Groundwater Increment 136
7.2 Annual Groundwater Draft 140
7.3 An Assessment of the Availability of Groundwater in the Semi-Confined to Confined (First) Aquifer 147
CHAPTER - 8 : QUALITY OF WATERS

8.1 Introduction 150
8.2 Importance of Quality 151
8.3 Collection of Water Samples 152
8.4 Methods of Chemical Analysis 156
8.5 Interpretation of Quality of Waters
(A) CHAMBAL-KUNWARI DOAB 158
   8.5.1 Surface Waters 158
   8.5.2 Groundwaters 160
(B) KUNWARI-SIND DOAB 162
   8.5.3 Surface Waters 162
   8.5.4 Groundwaters 163

CHAPTER - 9 : ORIGIN OF THE ALLUVIUM

9.1 Weathering of Rock Formations 166
9.2 Grain-Size Distribution 170

CHAPTER - 10 : WATER-LOGGING IN THE CHAMBAL

AYACUT AREA

10.1 Introduction 175
10.2 Types and Causes of Water-Logging 176
10.3 Remedial Measures of Water-Logging 183
CHAPTER - 11: SUGGESTED PATTERN FOR GROUNDWATER EXPLOITATION FOR IRRIGATION

11.1 Introduction 188

11.2 Areas Suitable for the Dug-Wells (Zone I) 192

11.3 Areas Suitable for the Dug-Cum-Bore Wells or the Shallow Tube Wells (Zone II) 193

11.4 Areas Suitable for the Deep Tube Wells (Zone III) 194

11.5 Areas Suitable for the Flowing Wells (Zone IV) 195

11.6 The Necessity of Exploitation of Groundwaters 195

SUMMARY AND CONCLUSIONS 201-218
