ACKNOWLEDGMENT

The writing up of a doctoral thesis is meant to be a penultimate act in recognising a person’s capacity to carry out independent research. Of course, putting this entire act together would not have been possible alone, though I may have faced numerous challenges and spent many sleepless nights in addressing them before coming to this stage. However, I am fully to blame for any incorrectness that may have crept in. Yet, I could not have arrived here without the help and support of many individuals, organisations and many, many others. Therefore, I would like to express my gratitude to all of them who have contributed in some way or the other towards this thesis.

My aspiration for pursuing doctoral research was made possible by Prof. N. Narayana Sastry, Research Guide, Former Professor & Director, Urban and Regional Planning, Institute of Development Studies, Manasagangothri, University of Mysore, Mysore.
