

## CONTENTS

<b>PREFACE</b>	<b>I</b>
<b>CHAPTER 1 THEORIES AND TECHNIQUES OF CRYSTAL GROWTH</b>	<b>1</b>
1.1 Introduction	1
1.2 The thermodynamics of crystal growth	2
1.3 Nucleation	4
1.4 Theories of crystal growth	6
1.4.1 Surface energy theory	7
1.4.2 Diffusion theories	7
1.4.3 Surface nucleation model	8
1.4.4 Screw dislocation theory	11
1.5 Crystal growth techniques	13
1.5.1 Solid state growth techniques	14
1.5.2 Growth from solution	14
1.5.2 (i) High temperature solution growth	15
1.5.2 (ii) Hydrothermal growth	15
1.5.2 (iii) Low temperature solution growth	15
1.5.2 (iv) The gel method	16
1.5.3 Growth from vapour	16
1.5.3 (i) Physical vapour transport (PVT)	16
1.5.3 (ii) Chemical vapour transport (CVT)	17
1.5.4 Melt growth techniques	17
1.5.4.1 (a) Bridgmann method	18
1.5.4.1 (b) Czochralski method	18
1.5.4.1 Zone growth method	18
References	19
<b>CHAPTER 2 CRYSTAL GROWTH BY GEL TECHNIQUE</b>	<b>23</b>
2.1 Introduction	23
2.2 Advantages of gel technique	25
2.3 The structure and properties of gel	26
2.4 Preparation of hydrosilica gel	26
2.5 The gelling mechanism	28
2.6 Crystallisation process in gel medium	30
2.6.1 The chemical reaction method	30
2.6.2 The chemical reduction method	32
2.6.3 Complexion decomplexion method	33
2.6.4 Solubility reduction method	33
2.7 Growth mechanism in gel	33
2.8 Control of nucleation in gel growth	35
2.9 Habit of the gel grown crystals	36
References	37

**CHAPTER 3 EXPERIMENTAL TECHNIQUES FOR CHARACTERISATION AND PROPERTY STUDIES OF CRYSTALS** **41**

3.1 Introduction	41
3.2 Optical microscopy	42
3.3 Etching studies	42
3.4 X-ray diffraction methods	43
3.5 FT-IR spectroscopy	44
3.6 Thermal analysis	45
3.6.1 Thermogravimetric analysis (TGA)	45
3.6.2 Differential thermal analysis (DTA)	45
3.7 Absorption and emission spectrometry	46
3.7.1 UV-Visible absorption spectroscopy	46
3.7.2 Emission spectrometry	47
3.8 Energy dispersive analysis by X-rays (EDAX)	48
3.9 Microhardness measurements	48
3.10 Magnetic measurements (VSM)	49
References	49

**CHAPTER 4 GROWTH OF MONO AND MIXED RARE EARTH HYDROGEN SELENITE CRYSTALS** **51**

4.1 Introduction	51
4.2 Chemical reaction associated with growth	52
4.3 Hydrosilica gel as growth medium	52
4.3.1 Preparation of hydrosilica gel	53
4.4 Preparation of feed (supernatant) solution	55
4.5 Observed growth kinetics of rare earth hydrogen selenite crystals	56
4.5.1 Praseodymium hydrogen selenite	56
4.5.1 (i) Effect of the pH value	57
4.5.1 (ii) Influence of the gel density and ageing	57
4.5.1 (iii) Influence of the concentration of reactants	59
4.5.2 Growth of mixed hydrogen selenite crystals	61
4.5.2 (i) Praseodymium neodymium hydrogen selenite	61
4.5.2 (ii) The effect of pH	61
4.5.2 (iii) Influence of age and gel density	63
4.5.2 (iv) Effect of concentration of feed solution	65
4.5.3 General features observed on the growth of mixed rare earth hydrogen selenite crystals	66
4.6 Conclusion	66
References	66

<b>CHAPTER 5 CHARACTERISATION OF THE GROWN CRYSTALS</b>	<b>68</b>
5.1 Introduction	68
5.2 Surface study of crystals	68
5.2.1 Morphology of the rare earth hydrogen selenite crystals	69
5.3 Spectroscopic analysis	72
5.3.1 X-ray analysis	72
5.3.2 Infrared spectra of crystals	76
5.3.3 UV-Visible absorption and emission spectra of rare earth hydrogen selenites	80
5.4 Energy dispersive X-ray analysis (EDAX)	91
5.4.1 EDAX of praseodymium neodymium hydrogen selenite	93
5.4.2 EDAX of praseodymium samarium hydrogen selenite	95
5.4.3 EDAX of neodymium samarium hydrogen selenite	97
5.5 Thermal analysis	97
5.5.1 Thermogravimetric analysis (TGA)	97
5.5.2 The differential analysis (DTA)	101
5.6 Conclusion	101
References	102
<b>CHAPTER 6 MICROHARDNESS STUDIES OF GROWN CRYSTALS</b>	<b>103</b>
6.1 Introduction	103
6.2 Vickers test	105
6.3 Corrections in measurements	106
6.4 Microindentation studies at low loads	108
6.5 Results and discussion	110
6.5.1 Variation of hardness with load	110
6.5.2 Influence of rare earth on the hardness of mixed crystals	111
6.6 Conclusion	113
References	114
<b>CHAPTER 7 MAGNETIC PROPERTIES OF RARE EARTH HYDROGEN SELENITE CRYSTALS</b>	<b>116</b>
7.1 Introduction	116
7.2 Theories of atomic paramagnetism	117
7.3 Paramagnetism	119
7.4 Magnetic properties of rare earth ions	123

7.5 Magnetic measurements	126
7.5.1 Stationary coil method	127
7.5.2 Moving-coil (extraction) method	127
7.5.3 Rotating-coil method	128
7.5.4 Vibrating coil magnetometer	128
7.5.5 Vibrating sample magnetometer (VSM)	129
7.6 Results and discussion	131
7.7 Conclusion	136
References	136

## **CHAPTER 8 GENERAL CONCLUSION** **138**

8.1 Introduction	138
8.2 Conclusions	138
8.3 Scope for future research	141
References	141
