ACKNOWLEDGEMENTS

It is a profound feeling to remember and thank those who have been of great help to complete this scientific quest. I sincerely feel that a personal pursuit as this one has an inherent obligation to acknowledge all those people, whose overwhelming support and cooperation was a major driving force to successfully accomplish the objectives of my doctoral research.

I have reserved my foremost gratitude to Dr Y. P. Venkatesh, Principal Scientist, Biochemistry and Nutrition department for providing me the opportunity to pursue doctoral research in his group and supervising the research program. I thank him for being a constant source of motivation and encouragement which has inspired me to improve my scientific performance. It is a privilege to work with him as he always tried to infuse orderliness and perfection to my work. I owe a debt of gratitude to Dr. Arun Chandrashekar, Ex-scientist, Plant Cell Biotechnology department, for his guidance and critical assessment of my research work. I deeply admire him for his generosity and exuberance towards scientific research as well as for association with my doctoral research.

I had a unique opportunity to work in two departments which was an enthralling experience in itself and provided numerous opportunities to learn different facets of scientific research. For this I have to thank Dr. G. A. Ravishankar, Head, Plant cell Biotechnology, who was collaborator in the research project and constantly encouraged to complete the tasks. In the same breath I must appreciate and tender my honest gratitude to Dr. Bhagyalaksmi N, Dr. P. Giridhar, Dr. R. Sarada, Dr. Nandini Shetty for their cooperation and encouragement during this research work. I must also gratefully acknowledge Dr. P. V. Salimath, Head, Biochemistry and Nutrition department and Dr G Venkateswara Rao, Director, CFTRI for constantly administering my doctoral research program. My special thanks to Dr. M.C. Varadaraj, Head, Human Resource Department for coordinating and constantly monitoring my progress in this research program.

It might sound like a cliché when I say that this project would have been difficult to accomplish if not for the co-operation and support of my fellow research scholars. The overwhelming support of my colleagues, Lokesh, Ramesh, Ashok, Harish, Venu, Vinod, Lincy, Reeta, Avinash, Kumudha, Padmaja, Uma, Najma, Gururaj, Mallikarjun, Chandrashekar, Shibin, Anila, Badrinath, Raghavendra, Surya,
Harsha, Sai, Wilfred, Rohini, Darukesh and many more, irrespective of their affiliation to different departments, has always shown their keen interest to assist in my research and share their much valued resources.

I am also appreciating Pramod, Sreenath, Ivan, Fatima, Ravi, Chandana, Shruti, Prasanna, Kiran, Dayanand, Manjunath, Umesh, Simmi, Daris, Imtiaz, Kavitha, Akitha, Padma, Bijesh, Divya, Kirti, Priyanka for creating a cordial and congenial environment for research. My sincere thanks to all the staff members of Agri-Horticulture department, Central Instrumentation Facility Services (CIFS) and CFTRI library for their constant cooperation and support.

I must thank DBT Government of India, New Delhi for Ph. D. studentship as well as a grant-in-aid project on eggplant research. I would like to thank various institutions, open access journals, and providers of bioinformatics webtools who made scientific information as well as research materials freely available. I sincerely appreciate their generosity and willingness to disseminate scientific knowledge and resources to researchers all around the globe. I am grateful to ABRC (USA), NBRC (Japan), Ohio State University (USA), Dr V. Sunderasan (UC, Davis), Plant Biotechnology Limited and Prof. George Lomonossoff (JIC, UK) for generously sharing their research materials.

I take this opportunity to express my heartfelt gratitude to my parents who have affectionately supported me in all the pursuits of my life including this one. I feel my accomplishments are testimony of their genuine affection, support and most importantly freedom to make my own choices. Equally important was the moral support, love and encouragement bestowed by Kavya, whose graceful presence itself has been a constant motivation all these years. I am thankful to my younger brother Satish for affectionately supporting me in this adventure. I am thankful to Mahesh and Shrikanth, for their invaluable help in bringing out my research thesis in the print form. I must conclude now as words have started to fail me; I can only hope that my heartfelt gratitude has effectively transcended in to words, to appreciate all those who have made the positive difference.
