Acknowledgement

“The road of life twists and turns and no two directions are ever the same. Yet our lessons come from the journey, not the destination.”

-- Don Williams, Jr. (American Novelist and Poet)

Research is an exciting journey of discovery, where there is an ever-shifting boundary between the known and the unknown. On the surface, the road to completing a Ph.D. looks like a lonely one, but without the contribution from numerous people in assorted ways, it would have been impossible for me to complete this journey. It is a pleasure to convey my sincere appreciation and gratitude to them all in my humble acknowledgment. I would first like to thank God who gave me the strength and privilege to pursue Ph.D. and successfully complete it in spite of many challenges faced.

I am deeply grateful to my supervisor, Prof. Shrikant Kukreti for his detailed and constructive comments that challenged and enriched my ideas, whilst allowing me the room to work in my own way. His suggestions always added another dimension of perfection to my work. Above all and the most needed, he provided me unflinching encouragement and support in various ways. His enthusiasm, simplicity and commitment to science deeply impressed me. I could not have imagined having a better advisor and mentor for my Ph.D.

I would like to express gratitude to Prof. Diwan S. Rawat, Dr Mahendra Nath and Dr. Harish Chandra, who are members of my Ph.D. advisory committee. Their perpetual energy and enthusiasm in research had motivated all the research students in the Department of Chemistry, University of Delhi, including me.

I wish to express my warm and sincere thanks to Prof. S. M. S. Chauhan, Head, Department of Chemistry, University of Delhi for providing the necessary facilities.

I acknowledge University Central Instrumentation Facility (USIC), University of Delhi for the access to the CD instrument required for my research work.

I acknowledge the relentless and generous support of Dr. Souvik Maiti, Scientist, CSIR-IGIB, for the access to the Tm instrument as and when required.
Without his kind support, it would have been difficult to conclude my Ph.D. work. I also like to extend my heartfelt thanks to alumna of our lab Dr Sarika Saxena, presently working as Assistant Professor, Amity University; for allowing me to use Tm instrument in her lab.

I would like to thank Dr. Mahima Kaushik, Assistant Professor, Ramjas College for the help and useful suggestions she has given me. I warmly thank my senior colleagues, Dr. Aparna Bansal, Dr. Shikha Kaushik, Dr. Kapil Roy and Dr. Bharti Arora for their valuable advice and friendly help. In particular, I would like to thank Dr. Kapil Roy for his criticisms and useful insights. I wish to thank my contemporary lab mates Anju Singh, Savita Joshi, Mohan Kumar, Swati Chaudhary, Saami Ahmed, Priyanka Thakral and Vartika Tomar for making our laboratory a convivial place to work. I am indebted to Satya Pandey, Research Scholar in Dr Souvik’s Lab, who took all the pain for arranging the time slots for my Tm experiments and for providing a friendly atmosphere in his lab.

I've also been fortunate to have a great group of friends. This includes Garima Talwar, Avini Kumar, Annu Mudgal, Nivedita Das, Ruby Bansal, Renu Bhatia, Arti Jain, Anuradha Bhardwaj, Surendra and many more. Thanks for camaraderie and emotional support, and for standing by me through thick and thin.

My deepest gratitude goes to my family for their unflagging love and support throughout my life. I am indebted to my parents (Mrs. Neeru Mahendru and Mr. Harsh Kumar Mahendru) especially to my mother, for her encouragement and support. Most of all, I owe my gratitude to my in-laws especially my mother-in-law (Mrs. Kiran Gupta) and father-in-law (Mr. Suniti Kumar Gupta) whose unconditional love and support have brought me this far. I would like to express my gratitude to my maternal grandfather (Mr. Ram Lal Kaushal), grandmother (Mrs. Raj Rani), grandmother-in-law (Mrs. Kusum Lata), maternal grandfather-in-law (Mr. Jagdish Raj Mahajan) and maternal grandmother-in-law (Mrs. Kushal Mahajan) who’s blessings and affection have been a constant source of inspiration. I am privileged to have a brother like Sahil Kumar Mahendru and brother-in-law like Vipul Gupta who with their sense of humour brightened my difficult times. My thanks and appreciation also go to Anviti Thakur, Prashant Thakur, Mohit Gupta, Anurag Gupta, Nishant Gupta, Arnav Gupta, Anupriya Aggarwal and Swati
Aggarwal for their love and support. Lastly, thanks to my dear husband, for his continued and unfailing love, support and understanding. I owe my every achievement to you, Nikhil!. The family is one of nature's masterpieces. I have no suitable word that can fully describe the everlasting love of my family for me.

For the financial support, I am greatly thankful to the University Grant Commission (UGC) for providing me junior research fellowship (JRF) during my tenure of Ph.D. course. I would specially thank Mr. Baldev Singh, Mr. Saroj and Mr. Amit for their help and cooperation in administrative work.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Swati Mahendru
