ACKNOWLEDGEMENT

Though only my name appears on the cover of this dissertation, a great many people have contributed to its production. I owe my gratitude to all those people who have made this thesis possible and because of whom my graduate experience has been one that I will cherish forever.

I would like to start with the person who made the biggest difference in my life, my Supervisor, Prof. S. M. Hanagodimath. He has been there, in front of my eyes for last three and a half years, motivating and inspiring every bit of me towards new possibilities in life. He has been a living role model to me, taking up new challenges every day, tackling them with all his grit and determination and always thriving to come out victorious. His attitude of living every moment as it comes, making serendipitous observation and converting them to new possibilities, correlating ideas and understanding the obvious has helped me come a long way and will always guide me in future. His analytical approach and critical evaluation have added new dimensions to the avenues of my thought. I also express my indebtedness to him for his love and friendly attitude. My heartfelt thanks are due to his family members for rendering me good hospitality and a homely atmosphere whenever I visited them.

I am immensely thankful to faculty members of the Department Prof. M. V. N. Ambikaprasad, Prof. T. Sankarappa, Prof. V. M. Jali, Prof. B. Sannakki, Prof. B. R. Kerur and Prof. R. D. Mathad for their support and encouragement during the course. Thanks are also due to all non-teaching staff of the department.

I sincerely express my deep sense of gratitude to Dr. L. Gerward, Professor Emeritus, Department of Physics, and Technical University of Denmark, Denmark for his invaluable support by providing WinXCom Program. I am always grateful to Late Dr. J. H. Hubbell, National Institute of Standards and Technology, Ionizing Radiation Division, USA for his encouragement and inspiration to carry out the present work.
I am thankful to Dr. J. Thipperudrappa, Department of Physics, BNM Institute of Technology, Bangalore, and Dr. D. S. Biradar, Department of Physics, Government Degree College, Kalaburgi for their encouragement and help in many ways.

My heartfelt gratitude’s to Dr. S. R. Manohara Assistant Professor, Department of Physics, Siddaganga Institute of Technology, Tumkur, Dr. Shivraj Gounhalli, Assistant Professor, Department of Physics, VG women’s college Kalaburgi, Dr. B. Siddlingeshwar, Assistant Professor, Department of Physics, M S Ramaiah Institute of technology and Dr. S. V. Nishti, Assistant Professor, Department of Physics, GFC, Sedam for their encouragement and guidance throughout my course.

Most importantly, none of this would have been possible without the love and patience of my family. My immediate family, parents Shantappa R Malipatil and Gundamma S Malipatil, my beloved brothers Veeresh, Jagadish, Sharanabasappa and Sister Anita G and brother-in-law Gollashewar, to whom this thesis is dedicated to, has been a constant source of love, concern, support and strength all these years. My extended family, sisters-in-law Vachanambika V, Sridevi J and Eramma S has aided and encouraged me throughout this endeavor. I also express my thanks to my brother’s children’s Yashashwini, Chinmayi, Yogini, Basavaprabhu, Basavashree, Shivaranjini, Basavaprasad, Sachhidanand, Lingananda and Yogananda.

I am also thankful to my fellow research colleagues, G. B. Mathpathi, Mrs. T. Sujata, Mrs Mayadevi, Omnath, P. K.
