## Preface

## Chapter 1

### Introduction

<b>1.1</b>	<b>Dithiocarbamates as ligands.....</b>	<b>2</b>
<b>1.2</b>	<b>Structural features of dithiocarbamate complexes.....</b>	<b>11</b>
<b>1.3</b>	<b>Copper—coordination chemistry.....</b>	<b>17</b>
	1.3.1 Copper(II) complexes.....	18
	1.3.2 Copper(I)—complexation characteristics.....	20
	1.3.3 Copper(I) complexes—stereochemistry.....	22
	1.3.4 Redox properties of copper(I)/(II) systems.....	27
	1.3.5 Biological copper.....	29
<b>1.4</b>	<b>Copper complexes of dithiocarbamates—a review.....</b>	<b>30</b>
	1.4.1 Copper complexes of dithiocarbamates derived from primary amines.....	35
<b>1.5</b>	<b>Scope and objectives.....</b>	<b>37</b>
	<b>References.....</b>	<b>41</b>

## Chapter 2

### General Experimental Methods and Techniques

<b>2.1</b>	<b>Materials.....</b>	<b>48</b>
<b>2.2</b>	<b>Preparative details.....</b>	<b>49</b>
	2.2.1 Dithiocarbamate ligands.....	49
	2.2.2 Polymer supported primary amines.....	50
	2.2.3 Polymer supported primary amine dithiocarbamates.....	50
<b>2.3</b>	<b>Elemental analysis.....</b>	<b>51</b>
	2.3.1 Copper.....	51
	2.3.2 Sulphur.....	51
	2.3.3 Carbon, hydrogen and nitrogen.....	52
	2.3.4 Chlorine capacity of polymer resin.....	52
<b>2.4</b>	<b>Spectral methods.....</b>	<b>52</b>
<b>2.5</b>	<b>Other analytical methods.....</b>	<b>53</b>
	2.5.1 Molecular mass determination.....	53
	2.5.2 Magnetic susceptibility.....	53
	2.5.3 Thermogravimetry.....	53
	<b>References.....</b>	<b>53</b>

### Chapter 3

## Interaction of Copper(II) with Dithiocarbamates Derived from Primary Amines: Existence of One-electron Redox Process and Formation of Polymeric Copper(I) Complexes

<b>3.1</b>	<b>Experimental</b> .....	<b>55</b>
3.1.1	Preparation of dithiocarbamate ligands.....	55
3.1.2	Interaction of Cu(II) with RHDtc (Preparation of Cu(I) complexes).....	58
3.1.3	Oxidation of RHDtc with iodine solution (Preparation of N,N'-disubstituted thiuram disulphides).....	61
<b>3.2</b>	<b>Results and discussion</b> .....	<b>63</b>
3.2.1	Redox process in aqueous medium.....	63
3.2.2	Interaction of Cu <sup>2+</sup> with RHDtc generated in ethanol medium.....	75
3.2.3	Structural aspects of Cu(I) RHDtc complexes.....	81
	<b>References</b> .....	<b>88</b>

### Chapter 4

## Interaction of Copper(II) with Dithiocarbamates Derived from Primary Amines: Formation of Dimeric and Tetrameric Copper(I) Complexes

<b>4.1</b>	<b>Introduction</b> .....	<b>90</b>
<b>4.2</b>	<b>Experimental</b> .....	<b>91</b>
4.2.1	Preparative details.....	91
4.2.2	Benzoylation reaction of Cu(RHDtc) complexes.....	94
<b>4.3</b>	<b>Results and discussion</b> .....	<b>95</b>
4.3.1	Nature of reaction between Cu <sup>2+</sup> and RHDtc in nonaqueous solvents.....	95
4.3.2	Dimeric and tetrameric species.....	99
4.3.3	Electrophilic substitution of the NH Proton of the N-monosubstituted dithiocarbamatocopper(I) complexes.....	113
4.3.4	Oligomeric CuRHDtc species from aqueous medium.....	117
	<b>References</b> .....	<b>126</b>

### Chapter 5

## Interaction of Copper(II) with Dithiocarbamates Derived from Primary Amines Immobilised on Polymer Support: Redox Stabilisation of Copper(II) State

<b>5.1</b>	<b>Introduction</b> .....	<b>127</b>
<b>5.2</b>	<b>Preparative details</b> .....	<b>131</b>
5.2.1	Polymer support systems.....	131
5.2.2	Polymer supported primary amine systems.....	132
5.2.3	Polystyrene supported primary amine dithiocarbamate systems.....	133
5.2.4	Interaction of copper(II) salts with the immobilised RHNCS <sub>2</sub> <sup>-</sup> systems.....	134
<b>5.3</b>	<b>Results and discussion</b> .....	<b>135</b>
5.3.1	Polymer support and immobilised dithiocarbamate systems.....	135
5.3.2	Interaction of polymer supported RHDtc with copper(II) salts.....	137

<b>5.4</b>	<b>Interaction of some Cu(II) chelates with the polymer bound RHDtc: an attempt to prepare mixed ligand complexes of Cu(II) involving N-monosubstituted dithiocarbamates .....</b>	<b>147</b>
5.4.1	Preparation details .....	148
5.4.2	Interaction of the copper(II) complexes with the polymer bound dithiocarbamates .....	149
5.4.3	Results and discussion .....	150
<b>References</b>	.....	<b>157</b>

## Chapter 6

### Thermal Studies on Some Copper(I) Complexes of Dithiocarbamates Derived from Primary Amines

<b>6.1.</b>	<b>Introduction .....</b>	<b>158</b>
<b>6.2.</b>	<b>Experimental.....</b>	<b>160</b>
<b>6.3.</b>	<b>Results and discussion .....</b>	<b>162</b>
6.3.1	Phenomenological aspects.....	163
6.3.2	Thermal stability .....	178
6.3.3	Kinetic aspects .....	181
6.3.4	Mechanistic aspects .....	190
<b>References</b>	.....	<b>196</b>

## Chapter 7

### Summary and Conclusion
