LIST OF FIGURES

Figure 1.1: Logarithmical length scale showing size of nanomaterials compared to biological components.

Figure 1.2: Photograph of famous Lycurgus cup which displays color, due to metal Crystals of Ag and Au (4:1).

Figure 1.3: Rosace nord stained glass in the Cathédrale Notre-Dame de Chartres (France)

Figure 2.1: Biosynthesis of AgNPs using A. niger

Figure 3.1: Aspergillus niger on PDA

Figure 3.2: Visual observation of color change from light yellow to reddish brown from A.niger

Figure 3.3: UV-Vis spectrum of AgNPs

Figure 3.4: TEM micrograph of AgNPs

Figure 3.5 (a): Particle Size Distribution of AgNPs by Intensity with Zeta Analyzer

Figure 3.5 (b): Zeta Potential of AgNPs produced by A.niger

Figure 3.6: FT-IR spectra of silver nanoparticles from A. niger

Figure 3.7 (a): SEM image of AgNPs, (b): Single nanoparticle

Figure 3.8: EDS spectrum of extracellular synthesized silver nanoparticles

Figure 3.9 (a): AFM Micrograph of AgNPs, (b): 3D image of AgNPs

Figure 3.10: X-ray diffraction of AgNPs synthesized from A. niger

Figure 3.11: Emission spectra of reaction mixture of AgNO3- fungal filtrate of A.niger

Figure 4.1: Antibacterial activity of AgNPs against bacterial pathogens

Figure 4.2: Biofilm formation (Castrillon et al., 2012 -Courtesy)

Figure 4.3: Production of biofilm by (a) E.coli and (b) S. aureus

Figure 4.4: Biofilm production by (a) E.coli, (b) S. aureus and antibiofilm activity of AgNPs on (c) E.coli, (d) S. aureus.
Figure 4.5: Cytotoxicity studies of AgNPs on HT-29 cell lines

Figure 4.6: Cytotoxic properties of AgNPs against HT-29 cell lines

Figure 5.1: Ultra structure of Gram positive and Gram negative bacteria

Figure 5.2: Gram negative bacterial cell wall

Figure 5.3: Generation of oxygen free radicals

Figure 5.4: Bactericidal activities of AgNPs on *E.coli*

Figure 5.5: Effect of AgNPs on *E.coli*

Figure 5.6: (a) Effect of Ag-NPs on Respiratory Chain Dehydrogenase of *E. coli*

Figure 5.6: (b) Effect of AgNPs which inhibits Dehydrogenase activity of *E.coli*

Figure 5.7: TEM micrograph of *E.coli* loaded with AgNPs

Figure 5.8: ESR spectrum of AgNPs recorded at room temperature

Figure 5.9: Formation of ROS in *E.coli*,

Figure 5.10: Antioxidant activities of AgNPs on *E.coli*

Figure 5.11: Schematic of AgNPs, Ag+ and cell interactions

**LIST OF TABLES**

Table- 3.1: Screening of fungi for AgNPs biosynthesis

Table- 4.1: Inhibition zone of AgNPs against bacterial pathogens
