ACKNOWLEDGMENTS

It is indeed a great opportunity for me to express my sincere gratitude and profound respect to my supervisor, Dr. H. C. Devarajegowda, Associate Professor, Department of Physics, Yuvaraja’s College, University of Mysore, Mysore, for his constant guidance, ceaseless encouragement and continuous support during my research work. I have been motivated most by his immense dedication to the research, plethora of innovative thoughts and a very high degree of discipline and sincerity. Any discussion with him has always been very enriching and rejuvenating. I indebted to him for his warm and unremitting support even in various non-academic problems. If I should thank one most for being able to submit my thesis from the University it would be my supervisor any word to express my gratitude towards him would fall short.

I would thank Professor S. N. Gayathri, Principal, Yuvaraja’s College, for providing the necessary facility in the Department. I also extend my thanks to Prof. D. Krishnegowda, Head, Department of Physics, Yuvaraja’s College, Prof. Revannasiddaiah, DOS in Physics, Manasagangotri, University of Mysore, Mysore, Prof. L. Parmesh, Chairman, DOS in Physics, Manasagangotri, University of Mysore, Mysore and Prof. C. B. Ramachandra, Former Principal, Yuvaraja’s College, University of Mysore, Mysore and for their kind co-operation.

I would like to thank all the members of our research group, particularly, Mr. S. Jeyaseelan, Mr. H. K. Arunkashi and Mrs. K. R. Roopashree for their encouragement and support.

I wish to thank my co-authors Mrs. M. Vinduvahini, Mr. Suresh Babu Vepuri, Prof. H. D. Revanasiddappa.

I am deeply indebted to all my teachers right from my school to the University for the knowledge I received throughout my academics.

I am at loss of words to express gratitude to my parents. The way I grew up, the values I imbibed, the education I received and the person I am now is all due to them. The tireless support and encouragement of my father needs a special mention. I am grateful to my caring and loving sisters and brothers who have always been an ardent listener and a strong support to me.
I would like to thank my wife Mrs. Hana’a Mohammed Eisa Al-eryani and children Wael, Salma and Lamis for their unwavering support and affection. Without my wife’s patience and understanding, it would hardly be possible to come out with this thesis.

Finally I sincerely thank the President, Professor Saleh Al-sulamy, University of Amran and the faculty of the Department of Physics, University of Amran, Saadah for their co-operation in bringing this thesis successfully.

Mysore,
May, 2012

Waleed Fadl Ali Al-eryani
