Table of Content

Abstract of the Research Work V
List of Figures IX
List of Tables XII

Chapter 1 Introduction and Overview 01

1.1 Research Problem ........................................ 01
  1.1.1 Background of the Study ........................ 01
  1.1.2 Purpose and Significance of the Study ........... 03
  1.1.3 Approach of the Study .............................. 05
  1.1.4 Objective of the Research ......................... 06
  1.1.5 Road Map of the Thesis ............................ 08

1.2 Fundamental Concepts ............................... 09
  1.2.1 Fundamental Concepts of Grid .................. 09
      a) Introduction to Grid ............................. 09
      b) Grid Computing .................................. 10
      c) Classifications of Grid ......................... 14
  1.2.2 Fundamental Concepts of Agent and Multi-agent Systems 16
      a) Introduction to Agents ......................... 16
      b) Agent Types ..................................... 17
      c) Characteristics of Agent ....................... 19
      d) Agent Application Domains ..................... 19
      e) Introduction to Multi-agent Systems .......... 20
      f) Advantages of Multi-agent Systems ............ 21
  1.2.3 Introduction to Knowledge-based Systems ....... 21
      a) Fundamental Concepts ........................... 21
      b) Architecture of Knowledge-based System ...... 22
  1.2.4 Fuzzy Logic and Fuzzy Expert Systems ......... 23
      a) Fuzzy Logic Basics ............................. 23
      b) Fuzzy Sets ....................................... 23
      c) Membership Function ............................ 25
      d) Linguistic Variables and Linguistic Hedges .... 25
Chapter 1 Development of Multi-agent Knowledge-based System Accessing Distributed Database Grid

1.1 Introduction to Data Grid
1.1.1 Introduction to Multi-agent Systems
1.1.2 Introduction to Agent-enabled Grid
1.1.3 Introduction to Knowledge-based System
1.1.4 Introduction to Dynamic Web Services
1.1.5 Conclusion

1.2 The Generic Framework for Integration of Multi-agent Knowledge-based System and Distributed Database Grid

1.3 Conclusion

References

Chapter 2 Literature Survey

2.1 Data Grids in Practice
2.1.1 Introduction to Data Grid
2.1.2 Databases and Data Grid
2.1.3 Data Grid Applications
2.1.4 The OGSA Grid Environment
2.1.5 Open Grid Services Architecture - Data Access and Integration (OGSA-DAI): A Middleware Infrastructure for Data Grids

2.2 Agent & Multi-agent Systems in Practice
2.2.1 Agent Technologies & Application Domains
2.2.2 Agent, Web Services and SOA
2.2.3 Agent Enabled Grid

2.3 Multi-agent Knowledge-based System by Integrating Fuzzy Logic

2.4 Motivation to Develop Multi-agent Knowledge-based System Accessing Distributed Database Grid

2.5 Conclusion

References

Chapter 3 The Generic Framework for Integration of Multi-agent Knowledge-based System and Distributed Database Grid

3.1 The High Level View of Layered Architecture of Generic Framework
3.1.1 Data Resource Layer
3.1.2 Communication Layer
3.1.3 Information Layer
3.1.4 Knowledge Layer
3.1.5 Application Layer

3.2 The Generic Framework for Integration of Multi-agent Knowledge-based System and Distributed Database Grid
3.2.1 Grid Fabric Layer

References
## Table of Content

3.2.2 Middleware Layer. ........................................ 65  
3.2.3 Knowledge Layer. ...................................... 72  
3.2.4 Application Layer. .................................... 73  

3.3 Conclusion .................................................. 74  
References ....................................................... 75  

Chapter 4 Detailed Methodology for Development of Framework 77  
4.1 The Computational Model for Generic Framework ............ 78  
4.1.1 Heterogeneous and Geographically Scattered Data Resources ........................................ 80  
4.1.2 The Data Grid Core Services. ............................. 80  
   a) Data Resource Plug-ins. ................................. 82  
   b) Activities & Activity Manager. ......................... 83  
   c) Workflow & Workflow Engine. ......................... 85  
   d) Resources & Resource Manager. ...................... 89  
   e) Server Context ........................................... 92  
   f) Security Context ........................................ 93  
   g) Configuration Loader .................................... 93  
4.1.3 Multi-agent System Environment. ......................... 93  
4.2 Implementation Scenario. ................................... 95  
4.3 Conclusion .................................................. 121  
References ....................................................... 121  

Chapter 5 Implementation of Experimental System 123  
5.1 Introduction to Grid-based Model. .......................... 123  
5.2 A Grid-based Model for Integration of Geographically Distributed & Heterogeneous Educational Resources for Knowledge Extraction & Delivery: A Case Study ........... 124  
5.3 Students’ Performance Evaluation: An Experimental System 128  
   5.3.1 An Architectural View of Students’ Performance Evaluation System. .......................... 131  
   5.3.2 Integration of Knowledge-based Component through Implementation of Fuzzy Logic. ........... 137  
   5.3.3 Students’ Performance Evaluation through Fuzzy Expert System .................................. 141  
   5.3.4 Advantages and Outcomes of an Experimental System ............................................. 149
