ACKNOWLEDGEMENT

The thesis dissertation marks the end of a long and eventful journey for which there are many people that I would like to acknowledge for their support along the way. As almost all PhD theses, this is no exception, as what the number of people that contributed to it is concerned and it is time to thank them for all they did for helping me to reach this goal.

To start with, my deepest thanks belong to my guide and supervisor Prof. (Dr.) M. Chandrasekaran, without his creativeness and patient way of sharing knowledge, this work would have been impossible. I am privileged to have him as a source of knowledge and an authentic educator offering me wise feedback. Our numerous discussions and daily routine work in Microbial Technology laboratory have given me the most interesting insights into my research field. I would like to thank him for all the advice, encouragement, help and everything that I learnt from him. I am also thankful for his encouragement during the times when my own faith grew thin.

I am thankful to Dr. Elyas K K for our many discussions and providing me advices and tips that helped me a lot in staying at the right track. My sincere thanks to him for keeping an eye on the progress of my work and being with me all the while with advices and providing the strength to take the right decisions at the right time. His extensive discussions about my work and interesting suggestions have been very helpful for this study.

I express my heartfelt gratitude to Dr. Sarita G Bhat, for her valuable suggestions and support as Co-guide and Doctoral Committee Member.

I am thankful to Dr. C. S. Paulose, Head, Dr. Padma Nambisan faculty member, and Dr. Vijayan, Emeritus professor, Department of Biotechnology, for their support and co-operation.

I express my deep sense of gratitude to Dr. Rajeev Sukumaran, who provided a constant source of inspiration, encouragement and support in my efforts. His ideals and concepts have had a remarkable influence on my entire career. I warmly thank him for his valuable advice and friendly help.
I was lucky to be a member of Microbial Technology Laboratory (MTL). I would like to extend my heartfelt thanks to all of MTL, since the atmosphere is very special: a place where everyone is friendly to everyone, and everyone can be asked for help, with a feeling of oneness and unity. Both from the preference and also from the real time spent there, I considered MTL my home.

Words fail to express my heartfelt gratitude to my seniors especially Dr. Sabu, Dr. Jayachandran, Dr. Keerthi, Dr. Swapna, Dr. Mohanan and Dr. Dasan. The extensive discussions with them about my work and interesting suggestions received from them have been very helpful for this study.

My heartfelt thanks to Dr. Sreeja Chellappan for her constant support and valuable suggestions during my research work. I thank her for her patience, moral support, encouragement, and co-operation.

"Shared suffering is halved suffering" and without the collective suffering of all my fellow Ph. D students together and mutual moral support, the pressure would have been unbearable. I greatly acknowledge the extensive co-operation and spontaneous help received from my colleagues Dr. Bijna, Mrs. Jasmin, Mr. Bernard, and Mrs. Manjusha.

Special thanks to Ms. Archana for her extensive co-operation and spontaneous help. Mrs. Beena, Ms. Jissa and Mr. Sijo, were always there with a helping hand throughout my research work. Words fail me in expressing my gratitude for them and I hope they understand my feelings. The great companionship, experiences and thoughts we shared are more valuable.

My sincere thanks to Mr. Madhu, Mrs. Lailaja, Mrs. Rosilin and Mr. Sajan Mr. Raghul, Mr. Manzur, Mrs. Sapna, Mr. Siju and Ms. Geena for their support and inspiration during my research.

I also extend my appreciation to Dr. Balaram, Mr. Binoy, Mr. Girish and all other friends at Neuroscience Laboratory, Department of Biotechnology, for their help and support.

My deepest sense of gratitude to Shri. Zaccharia, Syndicate Member; Dr. Rajappan Nair, former Dean; Dr. Unnikrishnan Nair, Science
Dean; Dr. Unnikrishnan Nair, Former Vice Chancellor and Prof. Abdul Aziz, Vice Chancellor for all the support provided by them during my course of study here.

I have no words to express my feeling of gratitude to Smt. Shanta Kumari, Smt. Ajitha, Smt. Usha, Smt. Ratna Bai and Shri. Ismail for all the help rendered by them. I am also grateful to all staff members of the Department of Biotechnology, and Planning and Academic sections, Cochin University of Science and Technology, for their help and co-operation. My sincere thanks to Shri. Wilson and Shri. Suresh Babu, Former and present Security Officers; Shri. Noushad, Shri. Binu, Shri. Sony and Shri. Kumar for their assistance.

The financial assistance from CSIR, Government of India, in the form of research fellowship is greatly acknowledged. I would like to express my gratitude to Mr. Cheruparambil Mohanan, PA to Head, CSIR for his help and support during my work.

As always, it is impossible to mention everybody who had an impact to this work. However, there are those whose spiritual support is even more important. I have no words to extend my deep sense of gratitude to my parents, brother, sister and all other family members who contributed their patience, moral support, encouragement, co-operation and blessings throughout this thesis work. Above all I would like to acknowledge the tremendous sacrifices that my parents made to ensure that I had an excellent education. For this and much more, I am forever in their debt.

Innumerable friends, colleagues and well-wishers were involved in this work directly or indirectly. I thank one and all for their generous help that has made this research work a reality. I extend my sincere gratitude and appreciation to all of them who made this thesis possible.

I am grateful to God Almighty for providing me all the blessings and strength for making this effort a success.

Soorej M Basheer
