ACKNOWLEDGEMENTS

I owe a debt of gratitude to my supervising teacher, Dr. K. M. Vyasa, Reader in Botany, University of Sagar, Sagar (M.P.), without whose able guidance and instructions, this work would not have been possible.

I am grateful to Prof. G. P. Mishra, Head, Department of Botany, University of Sagar, Sagar, for providing research facilities and encouragement.

I acknowledge my gratitude to Dr. G.N. Dwivedi, Principal and Dr. S.K. Gupta, Lecturer, Pt. J. N. College Banda (U.P.), who extended their help and cooperation during the tenure of this work.

I am also thankful to Professor S. B. Saksena, F.N.A., former Head, Department of Botany, University of Sagar, Sagar; Dr. D.M. Verma, Regional Botanist, Dr. R. Saran and Dr. R. Prasad of Botanical Survey of India, Allahabad; Dr. D. P. Chaudhuri, Director, AMSAR, Pvt. Ltd. Indore and Dr. Y. R. Saxena, Medical Specialist, District Hospital Sagar, for their valuable suggestions, encouragement and timely help in various ways.

Thanks are also due to the Director, Central Drug Research Institute, Lucknow, for very kindly providing me the pathogens needed for the present study.
I would not let the opportunity slip away without thankfully acknowledging the benefit of valuable assistance from my friends and colleagues. My heartfelt thanks are due to my parents, my wife Shanti and children, Saket and Soma for their sagacious advice and cooperation extended to me. Last but not the least I also acknowledge my gratification to the University Grants Commission, New Delhi for the grant of Teacher Fellowship under Faculty Improvement Programme, which enabled me to devote my full time and zeal to complete this work. I also thank Mr. S.K. Tiwari for his neat and careful typing of the manuscript.
