I take this opportunity to express my humble gratitude to Prof. R.K. Shah, Ex. Head, Department of Chemistry, Gujarat University, for his inspiring guidance during the entire course of this work. It was a privilege that he is easily available, approachable, ever willing to solve any problem that have arisen during the work. Without his affectionate and parental care and encouragement it would have never been possible to complete this work in such a short time.

I am also thankful to Prof. M.N. Desai, Vice-Chancellor, Gujarat University and Prof. Y.K. Agrawal, Head, Department of Chemistry for providing laboratory facilities.

I am also grateful to Dr. Ambu Bhai Patel, Retd. Dean, Gujarat Agricultural University and Dr. J.C. Patel, B.A. Institute of Agriculture, Anand for their help and encouragement.

I had the pleasure of working with my colleagues Mr. Ashwin Patel, Mr. Shekhar Sarbhai, Mr. D.K. Patel and Mr. B.P. Mehta who directly or indirectly helped me and cheered up during the course of my work. I am thankful to them.

I would not have made it where I am today but for the love and guidance that I received in limitless amounts from my elder brother Mr. Ved Prahask. I am grateful to him.

I am also grateful to the Government of Gujarat for awarding me Research Scholarship for this work.
