CONTENTS

CHAPTER 1

INTRODUCTION AND REVIEW OF EARLIER WORK

1.1 Introduction 1

1.1.1 Tritium: Physical Properties and Applications 1

1.2 Natural Production and Man-made Tritium 3

1.3 Movement of Tritium in the Environment 5

1.4 Detection and Measurement of Tritium 7

1.5 Review of Earlier Work on Tritium Distribution and Application 8

1.6 Present Work 15

CHAPTER 2

SAMPLE PROCESSING TECHNIQUES AND COUNTING METHODOLOGY

2.1 Introduction 17

2.2 Tritium Enrichment Techniques 17

2.2.1 Thermal Diffusion 17

2.2.2 Fractional Distillation 18

2.2.3 Electrolysis 19

2.2.4 Other Methods 19

2.3 Enrichment by Electrolysis 20

2.3.1 Details of the Electrolytic Method 20
CHAPTER 3

STUDY OF THE DISTRIBUTION OF TRITIUM IN TERRESTRIAL WATERS IN INDIA

3.1 Fresh Water Samples 61
3.2 Results and Discussion 69
CHAPTER 4

STUDY OF TRITIUM DISTRIBUTION IN THE ARABIAN SEA

4.1 Introduction 77
4.2 Sea Water Samples 78
4.3 Results and Discussion 80

CHAPTER 5

COMPARTMENTAL MODEL FOR DISTRIBUTION OF TRITIUM IN THE ENVIRONMENT

5.1 Introduction 87
5.2 Formulation of Compartmental Model 87
5.3 Rate Coefficients 89
5.4 Source Terms 90
5.5 Discussion 102

CHAPTER 6

SUMMARY AND CONCLUSIONS

6.1 General 103
6.2 Fresh Water Samples from Indian Sub-continent 104
6.3 Arabian Sea Water Samples 106
6.4 Three Compartment Model for Water Cycle 108
