ACKNOWLEDGEMENTS

My humble pranams to the lotus feet of AMMA, Chancellor, Amrita Vishwa Vidyapeetham, whose continuous support and blessings helped me to complete this thesis work successfully.

Although the work described in this thesis was performed independently, I never would have been able to complete it without the support of many wonderful people around me.

I would like to express my gratitude to my supervisors, Dr. Shikha Tripathi, Chairperson Department of Electronics and Communication Engineering, Amrita School of Engineering, Bangalore campus and Dr. K.V.V. Murthy, Visiting Professor, Indian Institute of Technology Gandhinagar, Ahmedabad, for their continuous support, encouragement and guidance that have guided me throughout my research work. I am grateful to them for setting high standards and giving me the freedom to explore many things and imbibe some of their quest for excellence, clarity of thought and quality of work which made me to remain focused to achieve my research goal.

My sincere thanks to Dr. S. G. Rakesh, Convener of the Doctoral committee and Associate Dean Amrita School of Engineering Bangalore campus, Dr. K.V. Nagaraja, Professor, Department of Mathematics and member of the Doctoral Advisory Committee for their inspiring and constructive suggestions during my entire research work. I would like to thank Dr. Nagaraj BN, former Dean Amrita School of Engineering, Bangalore campus for his consistent support for completing this thesis. On a broader note, I wish to acknowledge all the Professors of Amrita School of Engineering, Bangalore campus who have inspired me directly or indirectly.

My special thanks to Dr. M. V. Joshi, Professor, Dhirubhai Ambani Institute of Information and Communication Technology Ahmedabad, Gujarat for the encouragement, technical support and gracious permission for me to share his image data bases of images during my research endeavour.
I also thank Dr. Prakash Gajjar, (former research student, Dhirubhai Ambani Institute of Information and Communication Technology) and Prof. Pradipta Kumar Nanda (Institute of Technical Education and Research, Bhubaneshwar) for generously sharing their time and knowledge that influenced the work and resulted in cooperative joint publication.

I thank Dr. Vladimir P.G. Demidov, Yaroslavl State University, Russia, for sharing technical documents. I thank Dr. Pedro Real - Jurado, Department of applied mathematics, University of Seville, Spain, for his useful suggestions during the CAIP 2011 conference presentation. I thank Mr. Ron Rubinstein, research scholar, Technion Israel Institute of Technology for generously sharing source codes for validating our experimental results.

I also would like to acknowledge the support extended to me by Indian Institute of Technology, Gandhinagar, Ahmedabad, in connection with my stay there for few months for pursuing my research and collaboration with my guide Dr. K. V. V. Murthy, during the crucial stage of my thesis development.

I am indebted to my family members for their love, affection and blessings showered on me which directly or indirectly boosted my strength in completion of this thesis work. Finally my special thanks go to my wife Jyothi who relieved me from all my family responsibilities with infinite amount of patience during thesis preparation and for her loving prayers during my entire research work. Without her constant support this work would not have been completed successfully.

Amrita School of Engineering S. Ravishankar
Bangalore Campus, 24th November, 2014.
