ACKNOWLEDGEMENT

This thesis is the end of my journey in obtaining my Ph.D. I have not traveled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, colleagues and from various institutions. It is indeed a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me. At this moment of accomplishment, first of all I’m thankful to my supervisor, Dr. Mohtashim Lohani. I am very much thankful to him for picking me up as a student at the critical stage of my career; this work would not have been possible without his guidance, support and encouragement. Under his guidance I successfully overcame many difficulties and learned a lot. I can’t forget his hard times as despite of his busy schedules, he used to review my work progress, give his valuable suggestions and made corrections. His unflinching courage and conviction will always inspire me, and I hope to continue to work with his noble thoughts. I can repay him my proper gratitude only through my future work.

I express my warm and sincere thanks to Prof. S.W. Akhtar, Vice-Chancellor, Integral University, Lucknow for providing me the opportunity to pursue my Ph.D work at Integral University, Lucknow and a continuous encouragement throughout endeavor.

My warm regards also goes to Dr. I.A. Khan, Registrar, Integral University, Lucknow for smooth processing of Maulana Azad National Fellowship related fund documentation.

I extend my regards to Dr. Ghufran Ahmad, Registrar (Academic), Mr. Yusuf Kidwai, Mr. Rehan and Mr. Afzal Ahmad for their help in university related administrative processing of my thesis submission.
I am also thankful to Prof. A.K. Srivastava, Head, Department of Biosciences, Faculty of Applied Sciences, Integral University, Lucknow for his constant support and encouragement.

I am also extremely indebted to Dr. Gushan Wadhwa, Joint Director, Department of Biotechnology, Ministry of Science and Technology, New Delhi for providing necessary infrastructure and resources to accomplish my research work. I warmly thank Prof. Indira Ghose, Dean, School of Computational and Integrative Sciences, Jawaharlal Nehru University, New Delhi for his valuable advice, constructive criticism and his extensive discussions around my work.

I take this opportunity to sincerely acknowledge the University Grant Commission, Government of India, New Delhi, for providing financial assistance in the form of Maulana Azad National Fellowship which buttressed me to perform my work comfortably.

I gratefully acknowledge Dr. Mohd. Imran Siddiqui, Scientist, Central Drug Research Institute, Lucknow for his understanding, encouragement and personal attention which have provided good and smooth basis for my Ph.D. tenure. My thanks are due to Dr. Shailendra Kumar Gupta, Scientist, Indian Institute of Toxicology Research, Lucknow for his valuable suggestions and untried help during molecular dynamics simulations. I am thankful to Dr. Saif Khan, Sr. Assistant Professor, Department of Bioengineering, Integral University, Lucknow for his support during my experimentation in nanoparticles’ In silico designing. My thanks are due to Dr. Punit Kaur, Head, Department of Biophysics AIIMS and Dr. Imtiyaz Hassan, Jamia Milia Islamia for suggestions and inspiration.

I thank my RDC members, Prof. T. Usmani (Pro-Vice Chancellor), Dr. Mohd. Rizwan Baig (Examination Controller) and Dr. Abdul Rehman Khan (Dean, Faculty of Biosciences) for their helpful suggestions and comments during my progress report presentations.
The road to my Ph.D started with training at Centre for Computational Biology and Bioinformatics, School of Integrative Sciences, Jawaharlal Nehru University, New Delhi. I take this opportunity to offer heartfelt thanks to Dr. Naidu Subba Rao, Centre for Computational Biology and Bioinformatics, School of Computational and Integrative Sciences, Jawaharlal Nehru University, New Delhi for providing very good training on molecular structural analysis and building confidence in me to start my work on structural analysis of DNA repair enzymes.

Dr. P.K. Seth, CEO, Biotech Park, Lucknow deserves my sincere expression of thanks for providing me experimental hands-on-training on different aspects of Database development facility. I owe gratitude to Er. Varish Ahmad, Mr. Khurshid Ahmad, Mr. Azizur Rehman and Mr. Mohd. Saeed who willingly devoted so much time in giving me support.

Most of the results described in this thesis would not have been obtained without a close collaboration with few laboratories. I owe a great deal of appreciation and gratitude to Mr. Aditya Narayan Sarangi, SGPGI Lucknow for using software, for helping me to carry out part of my research work. My warm appreciation is due to all the Ph.D. students of that lab.

I expand my thanks to Dr.(Er.) Kavinder Kumar Kesari, University of Finland who shared his residence with me during my stay in New Delhi, and extended brotherly love towards me.

I would also like to thank some people from early days of my research tenure. Dr. Supratim Sengupta, School of Computational and Integrative Sciences, Jawaharlal Nehru University, New Delhi, and Dr. Babita Sharma, Head, Department of Biotechnology, IAMR, Ghaziabad were among those who kept me going at the beginning. This list is incomplete without acknowledging Er. Rajkumar Makartey Stephen, Sam Higginbottom Institute of Agriculture, Technology and Sciences, Allahabad who was the source of inspiration for me in my early days and who taught me many things.
It’s my pleasure to acknowledge Prof. A.H.A. Farooqui, Prof. Neelam Pathak, Prof. Iffat Zarin Ahmad, Dr. Mohd. Kuddus and Dr. Salman Akhtar for their constant moral support.

I am indebted to my many student colleagues for providing a stimulating and fun filled environment. My thanks go in particular to Mr. Mohd. Haneef, Assistant Professor, Department of Bioengineering, Integral University, Lucknow with whom I started this work and many rounds of discussions on my work with him helped me a lot. I am ever indebted to Er. Anupam Dhashmana and I admire his distinguished helping nature. My special appreciation goes to Mr. Syed Monowar Alam Shahid for his friendship and encouragement. I wish to thank my best friends Dr. Avinash Chaurasia and Dr. Shweta Chaurasia for their love, care and moral support. Er. Alvina Farooqi deserves special mention here for her constant support, motivation and help in the University related work. I am indebted to some of my good friends Mr. Sanjay Singh, Mr. Kamlesh Singh, and Mr. Satya Prakash for their valuable help and support.

It’s my affluence to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to Mrs. Anshu Bansal, Joint Secretary, Institute of Applied Medicines and Research, Ghaziabad for her support, generous care and the homely feeling at IAMR, Ghaziabad. She was always beside me during the happy and hard moments to push me and motivate me.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. I thanks to Mr. Sidharth Sinha, Mr. Nitesh Soni and Mr. Yousuf Ansari who were always there when I really needed. Thank you doesn’t seem sufficient but it is said with appreciation and respect to both of them for their support, encouragement, care, understanding and precious friendship. I am much indebted to Dr. Mohd. Haris Siddiqui, Head, Department of Bioengineering, Integral University, Lucknow for his valuable advice in my work, spending his precious times to read this thesis and gave his valuable suggestions. It is also a pleasure to
mention my good friend, Mr. Usman Sayeed for his love, care, support and creating a pleasant atmosphere for me here. I convey special acknowledgement to Er. Harshna Sharma. During the inevitable ups and downs of conducting my research she often reminded me life’s true priorities by what could be the influence of a loving Almighty Allah. This helped me a lot to work for hours tirelessly. I doubt that I will never be able to convey my appreciation fully, but I owe her my eternal gratitude.

Last but not least, I would like to pay high regards to my Parents, brother Mr. Mohd. Shahid Jamal and Mr. Qazi Mohd. Sharique Saleem for their sincere encouragement and inspiration throughout my research work and lifting me uphill this phase of life. In particular, the patience and understanding shown by my parents during the honors year is greatly appreciated.

I owe everything to them. Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project.

Qazi Mohd. Sajid Jamal
