CHAPTER 1 INTRODUCTION

1.1 Introduction 1

1.2 Organic pollutants in water 2
   1.2.1 Natural Organic Matter 3
   1.2.2 Biodegradable organic matter 6
   1.2.3 Non-biodegradable Organic matter 6
   1.2.4 Water disinfection byproducts 7

1.3 Effects of Organic Pollutants 8

1.4 Techniques of removal 11
   1.4.1 Wet air oxidation (WAO) 11
   1.4.2 Biological treatment 13
   1.4.3 Photo-Fenton reaction 14
   1.4.4 Adsorption of organic compounds onto activated carbon 16

1.5 Catalytic Wet Oxidation 17
   1.5.1 General principles 17
   1.5.2 Mechanism of Catalytic Wet Oxidation 18

1.6 Case studies and literature review 22

1.7 Objectives of the present work 26
CHAPTER 2  MATERIALS AND METHODS
  2.1 Catalysts used in the present work 27
  2.2 Catalyst characterization 30
    2.2.1 Characterization by XRD 30
    2.2.2 Characterization by FTIR 31
    2.2.3 Cation Exchange Capacity (CEC) measurement 35
    2.2.4 Characterization by Scanning Electron Microscope (SEM) 40
  2.3 Reactants 40
  2.4 Reaction Procedure 43

CHAPTER 3  RESULTS AND DISCUSSION 45
  3.1 Catalytic wet oxidation of phenol 45
    3.1.1 Effects of reaction time 45
    3.1.2 Effects of mole ratio of the reactant feed 48
    3.1.3 Effects of catalyst load 53
    3.1.4 Effects of phenol concentration 55
    3.1.5 Phenol conversion study with COD monitoring 59
    3.1.6 Confirmation of phenol conversion in a stirred reactor 59
    3.1.7 Analysis of the products 66
    3.1.8 Mechanism of phenol oxidation 66
    3.1.9 Discussion 76
    3.1.10 Conclusion from phenol oxidation study 77
  3.2 Catalytic wet oxidation of 4-chloro phenol 78
    3.2.1 Effects of reaction time 78
    3.2.2 Effects of mole ratio of the reactant feed 80
    3.2.3 Effects of catalyst load 83
    3.2.4 Effect of 4-CP concentration 86
    3.2.5 Mechanism of 4-CP oxidation 90
