LIST OF FIGURES

1.1 Global revenue of industrial enzymes market, 2009-2016($ MILLIONS) 1
2.1 Composition of lignocellulose 13
2.2 The Chemical structure of lignocellulose 13
2.3 Structural unit of cellulose 14
2.4 Xylan structure with side chains attached 15
2.5 Enzymatic hydrolysis of cellulose 19
2.6 Enzymatic hydrolysis of xylan 21
4.1.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas fimi* NCIM-5015 using rice straw 63
4.1.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas fimi* NCIM-5015 using rice straw 63
4.1.3 Predicted response Vs Actual value for cellulase by *Cellulomonas fimi* NCIM-5015 using rice straw 63
4.1.4 Predicted response Vs Actual value for xylanase by *Cellulomonas fimi* NCIM-5015 using rice straw 63
4.1.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas fimi* NCIM-5015 using rice straw showing the interactive effects of medium components 69
4.1.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas fimi* NCIM-5015 using rice straw showing the interactive effects of medium components 70
4.1.7 Predicted response Vs Actual value for cellulase by *Cellulomonas fimi* NCIM-5015 using rice straw 76
4.1.8 Predicted response Vs Actual value for xylanase by *Cellulomonas fimi* NCIM-5015 using rice straw 76
4.1.9 3D response surface plot for cellulase production from rice straw by *Cellulomonas fimi* NCIM-5015 showing the interactive effects of process parameters 77
4.1.10 3D response surface plot for xylanase production from rice straw by *Cellulomonas fimi* NCIM-5015 showing the interactive effects of process parameters 78
4.2.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas fimi* NCIM-5015 using wheat straw 80
4.2.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas fimi* NCIM-5015 using wheat straw 80

4.3.9 3D response surface plot for cellulase production from tapioca stem by *Cellulomonas fimi* NCIM-5015 showing the interactive effects of process parameters 111

4.3.10 3D response surface plot for xylanase production from tapioca stem by *Cellulomonas fimi* NCIM-5015 showing the interactive effects of process parameters 112

4.4.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas flavigena* NCIM-2481 using rice straw 114

4.4.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas flavigena* NCIM-2481 using rice straw 114

4.4.3 Predicted response Vs Actual value for cellulase by *Cellulomonas flavigena* NCIM-2481 using rice straw 114

4.4.4 Predicted response Vs Actual value for xylanase by *Cellulomonas flavigena* NCIM-2481 using rice straw 114

4.4.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas flavigena* NCIM-2481 using rice straw showing the interactive effects of medium components 120

4.4.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas flavigena* NCIM-2481 using rice straw showing the interactive effects of medium components 121

4.4.7 Predicted response Vs Actual value for cellulase by *Cellulomonas flavigena* NCIM-2481 using rice straw 127

4.4.8 Predicted response Vs Actual value for xylanase by *Cellulomonas flavigena* NCIM-2481 using rice straw 127

4.4.9 3D response surface plot for cellulase production from rice straw by *Cellulomonas flavigena* NCIM-2481 showing the interactive effects of process parameters 128

4.4.10 3D response surface plot for cellulase production from rice straw by *Cellulomonas flavigena* NCIM-2481 showing the interactive effects of process parameters 129

4.5.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas flavigena* NCIM-2481 using wheat straw 131

4.5.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas flavigena* NCIM-2481 using wheat straw 131

4.5.3 Predicted response Vs Actual value for cellulase by *Cellulomonas flavigena* NCIM-2481 using wheat straw 131

4.5.4 Predicted response Vs Actual value for xylanase by *Cellulomonas flavigena* NCIM-2481 using wheat straw 131
4.5.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas flavigena* NCIM- 2481 using wheat straw showing the interactive effects of medium components

4.5.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas flavigena* NCIM- 2481 using wheat straw showing the interactive effects of medium components

4.5.7 Predicted response Vs Actual value for cellulase by *Cellulomonas flavigena* NCIM- 2481 using wheat straw

4.5.8 Predicted response Vs Actual value for xylanase by *Cellulomonas flavigena* NCIM- 2481 using wheat straw

4.5.9 3D response surface plot for cellulase production from wheat straw by *Cellulomonas flavigena* NCIM - 2481 showing the interactive effects of process parameters

4.5.10 3D response surface plot for xylanase production from wheat straw by *Cellulomonas flavigena* NCIM - 2481 showing the interactive effects of process parameters

4.6.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas flavigena* NCIM- 2481 using tapioca stem

4.6.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas flavigena* NCIM- 2481 using tapioca stem

4.6.3 Predicted response Vs Actual value for cellulase by *Cellulomonas flavigena* NCIM - 2481 using tapioca stem

4.6.4 Predicted response Vs Actual value for xylanase by *Cellulomonas flavigena* NCIM - 2481 using tapioca stem

4.6.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas flavigena* NCIM- 2481 using tapioca stem showing the interactive effects of medium components

4.6.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas flavigena* NCIM- 2481 using tapioca stem showing the interactive effects of medium components

4.6.7 Predicted response Vs Actual value for cellulase by *Cellulomonas flavigena* NCIM - 2481 using tapioca stem

4.6.8 Predicted response Vs Actual value for xylanase by *Cellulomonas flavigena* NCIM - 2481 using tapioca stem

4.6.9 3D response surface plot for cellulase production from tapioca stem by *Cellulomonas flavigena* NCIM - 2481 showing the interactive effects of process parameters
4.6.10 3D response surface plot for xylanase production from tapioca stem by *Cellulomonas flavigena* NCIM - 2481 showing the interactive effects of process parameters

4.7.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas Biazorea* NCIM - 2550 using rice straw

4.7.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas Biazorea* NCIM - 2550 using rice straw

4.7.3 Predicted response Vs Actual value for cellulase by *Cellulomonas Biazorea* NCIM - 2550 using rice straw

4.7.4 Predicted response Vs Actual value for xylanase by *Cellulomonas Biazorea* NCIM - 2550 using rice straw

4.7.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas Biazorea* NCIM - 2550 using rice straw showing the interactive effects of medium components

4.7.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas Biazorea* NCIM - 2550 using rice straw showing the interactive effects of medium components

4.7.7 Predicted response Vs Actual value for cellulase by *Cellulomonas Biazorea* NCIM - 2550 using rice straw

4.7.8 Predicted response Vs Actual value for xylanase by *Cellulomonas Biazorea* NCIM - 2550 using rice straw

4.7.9 3D response surface plot for cellulase production from rice straw by *Cellulomonas biazorea* NCIM - 2550 showing the interactive effects of process parameters

4.7.10 3D response surface plot for xylanase production from rice straw by *Cellulomonas biazorea* NCIM - 2550 showing the interactive effects of process parameters

4.8.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas Biazorea* NCIM – 2550 using wheat straw

4.8.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas Biazorea* NCIM – 2550 using wheat straw

4.8.3 Predicted response Vs Actual value for cellulase production by *Cellulomonas Biazorea* NCIM – 2550 using wheat straw

4.8.4 Predicted response Vs Actual value for xylanase by *Cellulomonas Biazorea* NCIM – 2550 using wheat straw

4.8.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas Biazorea* NCIM - 2550 using wheat straw showing the interactive effects of medium components
4.8.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas Biazotea* NCIM - 2550 using wheat straw showing the interactive effects of medium components

4.8.7 Predicted response Vs Actual value for cellulase by *Cellulomonas Biazotea* NCIM – 2550 using wheat straw

4.8.8 Predicted response Vs Actual value for xylanase by *Cellulomonas Biazotea* NCIM – 2550 using wheat straw

4.8.9 3D response surface plot for cellulase production from wheat straw by *Cellulomonas biazotea* NCIM - 2550 showing the interactive effects of process parameters

4.8.10 3D response surface plot for cellulase production from wheat straw by *Cellulomonas biazotea* NCIM - 2550 showing the interactive effects of process parameters

4.9.1 Pareto chart showing the effect of media components on cellulase activity by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem

4.9.2 Pareto chart showing the effect of media components on xylanase activity by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem

4.9.3 Predicted response Vs Actual value for cellulase by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem

4.9.4 Predicted response Vs Actual value for xylanase by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem

4.9.5 Three-dimensional response surface plot for cellulase production by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem showing the interactive effects of medium components

4.9.6 Three-dimensional response surface plot for xylanase production by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem showing the interactive effects of medium components

4.9.7 Predicted response Vs Actual value for cellulase by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem

4.9.8 Predicted response Vs Actual value for xylanase by *Cellulomonas Biazotea* NCIM - 2550 using tapioca stem

4.9.9 3D response surface plot for cellulase production from tapioca stem by *Cellulomonas biazotea* NCIM - 2550 showing the interactive effects of process parameters

4.9.10 3D response surface plot for cellulase production from tapioca stem by *Cellulomonas biazotea* NCIM - 2550 showing the interactive effects of process parameters

5.1.1 Statistical evaluation of Logistic model for growth kinetics of *C.fimi* using (a) rice straw (b) wheat straw (c) tapioca stem
5.1.2 Statistical evaluation of Logistic model for growth kinetics of *C. flavigena* using (a) rice straw (b) wheat straw (c) tapioca stem

5.1.3 Statistical evaluation of Logistic model for growth kinetics of *C. biozatea* using (a) rice straw (b) wheat straw (c) tapioca stem

5.1.4 Growth curves profiles for production of cellulase and xylanase by (a) *C. fimi* (b) *C. flavigena* (c) *C. biozatea*

5.2.1 Statistical evaluation of Leudeking Piret model for product(cellulase) kinetics of *C. fimi* using (a) rice straw (b) wheat straw (c) tapioca stem

5.2.2 Statistical evaluation of Leudeking Piret model for product(cellulase) kinetics of *C. flavigena* using (a) rice straw (b) wheat straw (c) tapioca stem

5.2.3 Statistical evaluation of Leudeking Piret model for product kinetics (cellulase) of *C. biozatea* using (a) rice straw (b) wheat straw (c) tapioca stem

5.2.4 Product curves profiles for production of cellulase by (a) *C. fimi* (b) *C. flavigena* (c) *C. biozatea*

5.3.1 Statistical evaluation of Leudeking Piret model for product(xylanase) kinetics of *C. fimi* using (a) rice straw (b) wheat straw (c) tapioca stem

5.3.2 Statistical evaluation of Leudeking Piret model for product (xylanase) kinetics of *C. flavigena* using (a) rice straw (b) wheat straw (c) tapioca stem

5.3.3 Statistical evaluation of Leudeking Piret model for product kinetics (xylanase) of *C. biozatea* using (a) rice straw (b) wheat straw (c) tapioca stem

5.3.4 Product curves profiles for production of xylanase by (a) *C. fimi* (b) *C. flavigena* (c) *C. biozatea*
