List of Tables

Table 1  The pharmaceutical care process: An overview
Table 2  Demographic variables at baseline
Table 3  Demography distribution of subjects based on clinical conditions at baseline
Table 4  Distribution of subjects based on risk factors at baseline
Table 5  Discharge medications prescribed
Table 6  Pharmacoeconomic parameters among control and intervention group
Table 7  Global score of MacNew at different time intervals
Table 8  Visual analog score of EQ 5D 5L scores at different time intervals
Table 9  Calculated EQ 5D 5L utility values at different time intervals
Table 10 Paired t test between utility values and global scores for control group
Table 11 Paired t test between utility values and global scores for intervention group
Table 12 MacNew domain scores at different time intervals
Table 13 EQ 5D 5L domain wise responses at different time intervals
Table 14 Paired t test for lipid profile for control group
Table 15 Paired t test for lipid profile for intervention group
Table 16 Pill count scores at different time intervals for both groups
Table 17 Paired t test for fasting blood sugars for both groups
Table 18 Paired t test for body mass index for both groups
