List of Figures

Figure 1  Systematic approach for pharmaceutical care
Figure 2  12 lead ECG showing ST elevation at v1-V4
Figure 3  12 lead ECG showing non ST elevation and T wave changes
Figure 4  Pathophysiology of Myocardial Infarction
Figure 5  Myocardial Infarction process
Figure 6  Cardiac enzyme markers released after the onset of Myocardial Infarction
Figure 7  Balloon angioplasty catheter
Figure 8  Stents mounted on balloon catheter
Figure 9  Procedure of coronary angioplasty
Figure 10  Angiographic images before, after and at late follow-up after placing stent
Figure 11  Flow chart of methodology
Figure 12  Trends in MacNew global score at different time intervals
Figure 13  EQ Visual analog score at different time intervals
Figure 14  EQ Utility values at different time intervals
Figure 15  Domains of MacNew at different time intervals
Figure 16  EQ 5D 5L domain wise responses at different time intervals
Figure 17  Trends in pill count score at different time intervals
Figure 18  Fasting blood sugar values at baseline and at 12 months
Figure 19  Body mass index at baseline and at 12 months
