Acknowledgements

The title Doctor of Philosophy is one of the hardest earned of all that we strive for and it carries with it a sense of unmatched satisfaction and achievement. But to reach this destination there is cumulative energy of many people who guide and channelize our efforts by giving direction. Writing this is something I was really looking forward to. It's like winning an award and thanking everyone responsible for it will be simple to name all the people that helped ease and expedite the endeavor, but very tough to thank them enough. I will nonetheless try....

That is where the GURU comes in, rich in theory and diverse in practicality. It is with deepest sense of gratitude that I am attempting to reciprocate the magnanimity, which my guide Dr. P. D. Dwivedi, Scientist EI, Food Toxicology Division, Indian Institute of Toxicology Research (IITR), Lucknow has bestowed upon me. He introduced me into the realms of this research and opened new unknown, undiscovered vistas in front of me. The successful completion of this dissertation is a direct consequence of moral and material support extended by him throughout the Ph.D. Without his invaluable suggestions, constructive ideas and above all his friendly attitude this task would never have been successful. I shall remain eternally indebted for this inexhaustible enthusiasm, innovative and invaluable guidance. A special gratitude is due to him for being insatiable in the quest for improvement and knowledge and it has been my blessed privilege to work under a person of such eminence.

It is a matter of immense pleasure and privilege to express my sincere thanks and gratitude to Dr. S. Raisuddin, Reader, Department of Medical Entomology & Toxicology Jamia Hamdard University, New Delhi who as my co-guide has been a source of constant guidance and encouragement during entire course of the study. He has always been accessible and keen to discuss the progress of this research work and with his vast experience and acumen, imparted valuable constructive and timely suggestions. His valuable experience and knowledge reflects on every page of my work.

It is my duty to pay heartiest gratitude to respected Dr. K. C. Gupta, Director, Dr. C. M. Gupta, former Director-in-charge, Dr. Ashwini Kumar, former acting Director and Dr. Y.K. Gupta, former Director, IITR, Lucknow for providing an opportunity to work, laboratory facilities and encouragement.

It is with immense pleasure that I extend my special thanks to Dr. Mukul Das, Head, Food Toxicology Division, IITR. Through the course of my work I had the honor and privilege of the able and proficient guidance from him, who with his scientific insight and words of wisdom made a
difficult situation easy. I want to thank Dr. Sarwat Sultan, Head, Department of Medical
Elementology & Toxicology and Dean Prof. P.S. Srivastava, Jamia Hamdard University, New
Delhi for providing the help throughout this dissertation.

I express my deep gratitude to Dr. S. K. Khanna, Emeritus Scientist, IITR for kind
encouragement and constructive criticism in my progress. I would be failing in my duty if I do not
acknowledge Dr. Kausar Mahmood and Dr. Anurag Tripathi for their valuable help, support and
suggestions. I am thankful to Mr. R. C. Pandey & Mrs. Sumita Dixit for their time to time help. I
am thankful to Mr. S.K. Purushottam for his valuable help in animal handling through-out my
dissertation. I wish to pay my sincere thanks to my seniors Dr. Naveen E. Prasad Reddy, Dr. Manoj
K. Pandey, Dr. (Mrs) Meenakshi Tripathi and Dr. Ch. Kishore Babu for their help and fruitful
advice.

I also acknowledge Mr. Krishan Kant Mishra, Mrs. Neha Saxena, Mr. Vivek Mishra, Ms.
Manjari Dwivedi, Mr. Alok Kumar Verma, Ms. Sakshi Mishra, Mr. Gati krishna, Mr. Ashish
Yadav, Mr. Sandeep Srivastava and Mr. Sanjeev whose unaltering support helped me throughout
this study. I feel fortunate to have colleague like Mr. Rahul Kumar for providing valuable
suggestions and constant support to my research work.

Friends are the ones who find their way into our hearts with whom we share joy and who in
turn stand by us at the time of hardship. That way I am lucky to have lots of them, friendly as they
are and more so when I need. Ms. Vandana Arya, Mrs. Devyani Srivastava, Dr. Rakshi Agarwal,
Mrs. Manisha Nigam, Dr. Rohit Anthony Sinha and Dr. Nishi Srivastava.

My work has profited from the talent of several gifted people, I am indebted to Mr. Sunil
K. Verma and Dr. Pushpa Bhakuni for their help and encouragement over this period. I am thankful
to Dr. Amita Agarwal, Professor, Immunology Department, SGPGI, for moral support provided by
her during adverse conditions of this training. I extend my thanks to Dr. Rajendra Prasad, Professor,
Department of Pulmonary Medicine, Chhatrapati Shahuji Maharaj Medical University (CSMMU),
Lucknow, for providing me clinical samples and always taking a keen interest in my research work.

My sincere appreciation goes to the entire IITR faculty and staff members, who were
always helpful when approached.

It is my privilege to express most profound gratitude to my Grandfather Late Shri G. P.
Misra for his love, blessings, encouragement and moral support during my entire academic career.

I feel fortunate to have a father like Prof. M. K. Misra. I am thankful for his love,
guidance, moral support and unwavering suggestions during the course of this research. The influence
of this erudite and scholarly person has instilled in me the importance of patience, constant efforts
and perseverance towards development of vigorous scientific temperament. I have no words to acknowledge the silent but solid support of my mother Smt. Mithlesh Misra which acted as the foundation of my accomplishments both personally and academically and strengthening me by providing moral support during this study. I am extremely thankful to my parents for their blessing, patience and unestimated moral support that have brought me this far.

My efforts remain incomplete if I fail to express my sincere gratitude to my elder sisters Dr. Aparna Misra and Dr. Alka Nivedan and Jitin Mr. Rajan Mishra and Mr. Nivedan Pandey for their unconditional support and affection during the course of my work. The vote of thanks shall not complete unless I especially thanks to my younger sister Ms. Anamika Misra whose love, unfaltering moral support and constant reassurance was like the pole star that kept on showing me the way ahead. I cannot sufficiently express in words, my special debt of gratitude to my companion Mr. Arun Shukla, who has always been supportive and encouraging during the tough period of thesis compilation.

I am thankful to Department of Biotechnology (DBT), New Delhi for providing financial support. I am extending my thanks to Indian Council of Medical research (ICMR), New Delhi for awarding Senior Research Fellowship and providing financial support.

Above all, I have done this work by the grace of Almighty GOD, who served as a beacon light during the course of dissertation.

(Amita Misra)
