Acknowledgement

It is a moment of gratification and pride to look back with a sense of contentment at the long travelled path, to be able to recapture some of the fine moments, to be able to thank infinite number of people, some who were with me from the beginning and some who joined me at some stage during the journey. The kindness, love and blessing showered by them have brought this day; I wish to thank each one of them with all my heart.

I will grab this opportunity to thank ‘The Almighty’ for the wisdom and perseverance that he has been bestowed upon me during this research project, and indeed, throughout my life: "I can do everything through him who gives me strength."

Words seem insufficient to express my deep sense of gratitude, to beloved and respected guide Prof. C. N. Patel for his excellent guidance, critical supervision, keen interest and continuous encouragement throughout this study. I have been extremely lucky to have a supervisor who cared so much about my work, and who responded to my questions and queries so promptly. His active guidance helped me to develop skills and insight in the research and scientific presentation.

I express my heartiest thanks to Prof. Shailesh A. Shah, Principal, Maliba Pharmacy College, Uka Tarsadia University for providing me guidance, encouragement, invaluable advice and moral support during the course of this work.

My research for this dissertation was made not only more efficient but also much more extensive through the use of several electronic resources. Thus I gladly express my gratitude to Prof. Dinesh R. Shah, Provost, Uka Tarsadia University and Management of Bardoli Pradesh Kelavani Mandal for providing necessary facilities for this work.

I express my heartiest thanks to Prof. K R. Desai, Head, Department of Chemistry, Uka Tarsadia University for providing me guidance, encouragement, invaluable advice and moral support during the course of this work.

My warm thanks to Prof. Abhay Dharamsi, Head, Pharmaceutics Department for their helpful suggestions.
Also, I am thankful to Dr. Ashish D. Mishra, Head, Pharmaceutical Chemistry Department, Maliba Pharmacy College, for his support, guidance, advice throughout the research project, as well as his pain-staking effort in proof reading the drafts.

I am heartily obliged to friend, Sandesh for his constant support during research work and Shrikant for his untiring help in docking studies and thesis writing. They have always encouraged, criticized and supported me in my project. I found them always with me, whenever I was stuck somewhere. Their support and confidence in me has helped me immensely in my difficult time.

I am equally grateful to Dr. Bhavin A. Vyas, friend and HOD, Pharmacology Department, for his scientific advice, knowledge, many insightful discussions and suggestions. I can see the good shape of my thesis because of his help in completion of biological work.

My greatest appreciation goes to my closest friend, Mr. Kunjan Bodiwala who was always there to help me at all time for analytical work. I thank him for questioning me about my ideas, helping me think rationally and even for discussing my problems.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to Akshay and Ketan for their support, generous care and the homely feeling in Gujarat. They were always beside me during the happy and hard moments to push me and motivate me. A journey is easier when you travel together. Interdependence is certainly more valuable than independence. Thank you doesn’t seem sufficient but it is said with appreciation and respect to both of them for their support, encouragement, care, understanding and precious friendship. I doubt that I will ever be able to convey my appreciation fully, but I owe them my eternal gratitude.

I would like to express my debt of gratitude to Dr. Renu Chauhan, Dr. Bhavin Marolia, and Pintu Prajapati for their help in analytical work; Dr. Paras Patel for his technical help during thesis writing.

I am also thankful to my friend Bhavik Satani for making availability of chemicals.
Acknowledgement

I am also thankful to my friends and colleagues Vilas Surana, Payal Shah, Hetal Patel, Pranav Shah, Furqan Maulvi, Sanjay Tiwari, Arti Gupta, Sonia Pandey, Praful Dedhiya, Vivek Patel, Pratik Tailor, Janki Desai, Meena Purohit, Heta Vyas, Ankita Patel and Josana Panchal for their constant support and timely help.

I would like to thank Kishorbhai, Vijaybhai, and all lab assistants for their help in laboratory. I would also like to thank Mr. Kavit Patel, who helped me in carrying out literature survey.

I take this opportunity to express the profound gratitude from bottom of my heart to my loved Parents, my dear brother Dattatraya, sister in law Varsha and sister Seema, in law Satish for their love and continuous support – both spiritually and materially.

Most importantly, I would like to thank my wife Shilpa. Her support, encouragement, quiet patience and unwavering love were undeniably the bedrock upon which the past four years of my life have been built. Her tolerance of my occasional annoyed behavior is a testament in itself of her unyielding devotion and love. Whose faithful support throughout PhD made my journey smooth and fruitful.

No words would suffice to express my deep rooted feeling of thankfulness to my son Shaurya, whose patience was tested to the utmost by long period separation. None would understand this, as much, as I do, that without his loving support, patience, sacrifice, forbearance and endurance, this study would have ever seen the light of the day.

Besides this, I am thankful to all those who have directly and indirectly helped me in the successful completion of this project.

Finally, I thank the almighty for giving me strength, inspiration and positive energy to complete my research work.

Gajanan Govindrao Kalyankar
