November, 2011
DEDICATED
TO
MY BELOVED FAMILY
ACKNOWLEDGEMENTS

As the first, the vote of thanks starts with Allah who actually gave me the opportunity, inspiration and energy to craft this work.

This thesis is dedicated to my parents and my brothers and sisters, whose love, care, sacrifice, affection and support provided me the strength and perseverance I needed to achieve my goals and taught me the beauty of life and the patience to live it. I owe everything I have to them.

Throughout my research experience, there are several people who deserve credit and appreciation for their role in making this thesis possible. I sincerely feel short of words to acknowledge all those who helped me directly and indirectly during the conclusion of this work.

First and foremost, I feel honored and pleased to express my most sincere regard and deep sense of gratitude to my supervisor Dr. Waseem Ahmad Siddiqui, Assistant Professor, Department of Biochemistry, Jamia Hamdard, New Delhi, for his affectionate inspiration, cool attitude, constant encouragement, calmest approach and creative and helpful guidance to tide over difficulties during this course of study. Words are insufficient to express his affectionate and co-operative nature coupled with deep knowledge of the subject, makes him a unique human being.

I would like to express my gratitude to my teachers Drs. Saleem Javed, Mohd. Mujeeb, Rana Zaidi, Faraha Khan and Deeba S. Jairajpuri for their treasure of valuable inspiring guidance, disciplined technical advice and courage to sustain the efforts to complete my research.

I humbly record my deep sense of gratitude to Prof. Shakir Ali, Head of the Department of Biochemistry, who enlightened my path to complete my research. His overall help, encouragement and constant presence proved to be a source of inspiration and motivation. He has been a driven force behind my efforts.

It gives a great pleasure to acknowledge to Prof. M.Z. Abidin, Dean Faculty of Science for his generous consideration and facilities provided.

My heartfelt gratitude and appreciation goes to the Vice Chancellor Prof. G.N. Qazi for taking keen interest in research and developmental programs ongoing in the University.

Dr. Saleem Javed, Dr. M.Z. Abidin, Dr. S. D. Sharma and Mr. Mohd. Irshad are highly acknowledged for the help provided during experimental work in Central Instrumentation Facility.

I also take this opportunity to express my gratitude and appreciation to lab technician Mr. Islamuddin. He has extended all possible help and has always made my lab work easier. Thanks are also due to other department staff Mr. Aslam bhatti, Mr. Iqbal, Ms Rosamma and Mr. Shujaat, Mr. Alam, Mr. Shaukat and Pandit ji who one way or other contributed either directly or indirectly throughout the duration of research are highly acknowledged, forever ready help and cooperation.
I will remain thankful to the staff of animal house Mrs. Abhrisham, Tariqat, Ibrahim and Sant Raj for all the help extended to me during the course of my work, which was always helpful to me. I will always remain thankful to them.

I would like to take this opportunity to thank Mrs. Zia Fatima and Mr. Shamim the librarians of Science Faculty, Jamia Hamdard, for helping me to refer books and journals in our esteemed library.

I am extremely thankful to my labmates during the tenure of the study: Dr. Md. Adnan Kausar, Mohd. Rashid Khan, Amjad, Zeeshan and Shabeena Siddiqui for their support during the course of my work.

I am most grateful to my seniors, Drs. Andaleep, Gulruna, Tamanna, Sikander, Mushahid, Badar, Ishrina, Babita, Rizwana, Ram Prasad, Mohd. Naseem, Altaf Ahmad, Minhaj, Heena and Naseem for their suggestions and help during the course of study.

My sincere thanks and appreciation to all my colleagues and friends: Ms. Iram Rais, Shahnaz Malik, Rifat hamid, Pinki and Mr. Mehboob Ahmad, Bashir, Amir, Asif, Samina, Amna, Indusmita, for their love, support, kindness, understanding, and above all their patience which always provided me the necessary drive and inspiration to work hard.

It gives a great pleasure to acknowledge my immense respect and depth of gratitude to my esteemed brother Dr. Tauheed Ishrat who have done a lot for me. His valuable experience was of tremendous help and was always a source of ideas. My constant discussions were always fruitful and has a played an important role in making this thesis a reality. Without his contribution this thesis would have been incomplete.

I would like to thanks to my Harapan friends Darakshandha, Kamal Naseem, Uzma and Ritu who have stood by me during times of joy and frustration and have always extended a helping hand to me during the duration of my stay. Thanks are also due to my friends with whom I have spent considerable time and were like family.

Lastly I would like to express my appreciation to UGC and CSIR, Ministry of Health and Family Welfare, Government of India, New Delhi, for granting me the RFMS and SRF fellowships respectively.
