ACKNOWLEDGEMENTS

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me. In the process of writing a thesis of this kind many people are involved and hence should have their name mentioned and their contribution emphasized. Though the list of these contributors would become long, far-reaching and the risk of forgetting people impending. Therefore I send out a great thanks to those who are directly or indirectly are a part of the realization of this research.

Still there are a handful of people that has contributed to a greater extent and made this possible. Firstly, I would like to thank my Guide, Dr. S. O. Junare. I owe my deepest gratitude to him for his guidance, encouragement and support throughout the research. He has been my director, my mentor, and a never-ending source of moral support. I am also heartily thankful to him for giving his valuable advice and critical comments during research work. I would also like to thank the rest of my thesis PhD review committee members for providing me with their invaluable inputs on my research.

I would also like to express my thanks to all Senior Managers and other officials from the various Chemical Industries in Gujarat who had taken out time from their busy schedule and supported me by providing the information required for my research.

This work would not have been possible without the support of my Institute Director Dr. Tejas N Dave. He was always there for me, when I need help with my research and when I need moral support. He becomes instrumental in helping me finding my dissertation topic. His constructive criticism and collaboration have been tremendous assets throughout my PhD research.

I convey special acknowledgement to Dr. Tejas Shah, for his guidance in critical areas of research methodology and data analysis. His knowledge in these fields has benefited me a lot.

I would like to acknowledge the academic, administrative and technical support of the Kadi Sarva Vishwavidyalaya as well as of Kalol Institute of Management for their continuous help and support during research work. I am also thankful to the Management of IIM, Ahmedabad library for grating me the permission to use their
library resources in terms of getting required research papers and books starting from initial stage to concluding stage of my thesis work.

I have also been fortunate to have a great group of friends and colleagues. This includes my colleagues, many other students and faculty, too numerous to name. Not only they are the people I can discuss my research with and goof off with, but also whom I can discuss my troubles with and who stand by me through thick and thin.

Finally, I would like to dedicate this work to my family, without their unending support and love; I never would have made it through this process. My parents have given me their unequivocal support throughout, as always, for which my mere expression of thanks likewise does not suffice.

Thank you!!
